RESOLUTION NO. 22093

Background

The Illinois State Toll Highway Authority ("Tollway") advertised for sealed bids on Contract I-20-4517 for Roadway & Bridge Reconstruction on the Tri-State Tollway (I-294) between Mile Post 17.5 (95th Street) and Mile Post 19.7 (Plaza 36). The lowest responsive and responsible bidder on Contract No. I-20-4517 is F.H. Paschen, S.N. Nielsen & Associates, LLC in the amount of $124,441,582.77.

Resolution

Contract No. I-20-4517 is awarded to F.H. Paschen, S.N. Nielsen & Associates, LLC in the amount of $124,441,582.77, subject to all required approvals, the contractor satisfying applicable DBE, financial and all other contract award requirements, and execution of all contract documents by the bidder and the Tollway.

The Chairman and Chief Executive Officer of the Tollway is authorized to execute the aforementioned Contract, subject to the approval of the General Counsel and the Chief Financial Officer, and the Chief Financial Officer is authorized to issue warrants in payment thereof.

If the bidder fails to satisfy the contract award requirements, the Executive Director is authorized to approve an award to the next lowest responsible bidder, in accordance with the applicable contract award requirements, and execution of all contract documents by the bidder and the Tollway. The Chairman and Chief Executive Officer of the Tollway is authorized to execute any contract awarded to the next lowest bidder, subject to the approval of the General Counsel and the Chief Financial Officer, and the Chief Financial Officer is authorized to issue warrants in payment thereof.

REQUIRED DOCUMENTS

ADDENDUM NO. 2
TO
CONTRACT REQUIREMENTS
FOR CONTRACT I-20-4517
ILLINOIS STATE TOLL HIGHWAY AUTHORITY

Date: 7/28/2020

For which proposals will be received by the Illinois State Toll Highway Authority at its offices, 2700 Ogden Avenue, Downers Grove, Illinois 60515 until 10:30:00 A.M. local time, **August 7, 2020.**

NOTICE OF REVISION TO CONTRACT

NOTES:

1. The following revised Special Provision pages are included in the Contract with this Addendum: J-viiiRR, J-113R, J-713R through J-715R, J-717R, J-718R.

2. The following revised Contract Drawings are included in this Addendum:
   Volume 1 – Drawings 49, 171, 199, 200, 202, 204, 206, 207, 209, 213

3. A new reference document has been posted to the Online Plan Room: Geotechnical Report - Tri-State Tollway I-294 (Phase II) Project - Light Pole and Overhead Sign Structures - I-294 Mile Post 17.6 to Mile Post 19.2 - Approximate Station 932+04.00 to 1018+48.00 - ISTHA Contract Number I-17-4296-C01 - Cook County, Illinois – July 23, 2020.

CHANGES TO THE CONTRACT REQUIREMENTS

CHANGES TO THE CONTRACT SPECIAL PROVISIONS

Change #1 Contract Requirements, Volumes II and III, replace page J-viiiR with page J-viiiRR. This replacement contains the following revision (attached):

1.1. Updated Table of Contents to show revised page numbers for revised special provisions as part of this addendum.

Change #2 Contract Requirements, Volume II, replace page J-113 with page J-113R. This replacement contains the following revision (attached):

2.1. Revised revision date of Geotechnical Report for Light Poles and Sign Structures to July 23, 2020.

Change #3 Contract Requirements, Volume II, replace pages J-713 through J-715 with pages J-713R through J-715R. These replacements contain the following revision (attached):

3.1. Revised special provision for Install Conduit to latest Central Tri-State Tollway version. Locations of revisions are shown with a vertical line. Note that page J-715R is included due to a change in page break locations.

Change #4 Contract Requirements, Volume II, replace pages J-717 and J-718 with pages J-717R and J-718R. These replacements contain the following revision (attached):

4.1. Revised special provision for Duct Package to latest Central Tri-State Tollway version. Locations of revisions are shown with a vertical line.

CHANGES TO THE CONTRACT DRAWINGS

Change #5 Contract Plans, Volume 1, Drawing 49. Proposed Typical Sections. This drawing contains the following revision (attached):

5.1. Revised shoulder slope on moment slab.

Change #6 Contract Plans, Volume 1, Drawing 171. Roadway Plans. This drawing contains the following revision (attached):

6.1. Corrected shoulder width callout.

Change #7 Contract Plans, Volume 1, Drawings 199, 200, 202, 204, 206, 207, 209, 213. Roadway Profile and Superelevation. These drawings contain the following revisions (attached):

7.1. Revised shoulder cross-slopes.

7.2. Added callouts indicating range of cross slopes for areas with variable cross slope.

END OF ADDENDUM CHANGES

Environmental Investigation - Tri-State Tollway I-294 (Phase II) Project - I-294 M.P. 17.8 to M.P. 20.6 - Archer Ave. (IL-171) Station 120+34 to Station 215+92 - ISTHA Contract Number I-17-4296 - Cook County, Illinois - November 6, 2019

INSTALL FURNISHED UNDERGROUND CONDUIT, COILABLE NON-METALLIC, SDR 11, (CTS V1.2)

Description: This work shall consist of installing and testing coilable non-metallic conduit (CNC), fittings, and accessories, as part of a raceway bored, plowed, or trenched, and pulled in place.

Material. The conduit shall be a solid-wall high density polyethylene (HDPE) duct intended for underground use and can be manufactured and coiled or reeled in continuous transportable lengths and uncoiled for further processing and/or installation without adversely affecting its properties or performance.

The conduit shall meet the requirements of the following standards:

- American Society for Testing and Materials (ASTM) D 3350, minimum cell class of PE334480 C or E in conformance with Standards D3350 and F2160 of the American Society for Testing and Materials (ASTM).
- National Electrical Manufacturers Association (NEMA) Standard TC 7 (2013) for Smooth Wall Coilable Electrical Polyethylene Conduit

The coilable non-metallic SDR-11 conduit properties shall conform to the nominal dimensions shown in the table below:

Nom. Duct Diameter (in)	Nom. Outside Diameter (in)	Nom. Inside Diameter (in)	Min. Wall Thickness (in)
1	1.315	1.055	0.120
1 ¼	1.660	1.338	0.151
1 ½	1.900	1.533	0.173
2	2.375	1.917	0.216
2 ½	2.875	2.322	0.261
3	3.500	2.825	0.318
4	4.500	3.633	0.409
6	6.625	5.348	0.602

CONSTRUCTION REQUIREMENTS

(a) The installation shall be in accordance with Section 810 of the Illinois Tollway Supplemental Specifications.

(b) The Contractor shall be responsible for coordinating with the Engineer and the procurement contractor to schedule a pickup of the CNC. The schedule shall be submitted to the Engineer a minimum of 14 days prior to the scheduled pickup date.

(c) The CNC(s) will be picked up within a 10-mile radius of the I-55 @ I-294 interchange and stored at the Contractor facility until time for installation. The Contractor shall provide all equipment, lifting cables and hardware needed to off-load and set the pole.

The Contractor shall closely coordinate the work prescribed under this special provision with the Engineer. This includes, but is not limited to, the following:

Conduit Installation

In Duct Package

- The conduit shall be installed in minimum lengths of 1000 feet. All splices shall be fusion spliced. Conduit bends shall be made manually to prevent conduit damage or possible reduction to the inside diameter of the conduit.

- All underground raceways shall have a minimum depth of 33 inches below finished grade unless otherwise indicated on the plans. All raceways installed beneath pavement shall have a minimum depth of 45 inches below the top of pavement to avoid conflicts with the underdrain system unless otherwise indicated on the plans or directed by the Engineer.

PLOWED

- Plowing shall be done with equipment capable of feeding the conduit through the plow. Equipment which pulls the conduit behind a bullet-nose plow will not be allowed except by written approval of the Engineer. The plow shall be capable of plowing a cavity and placing the conduit to the specified depth in a single operation without kinking or otherwise damaging the conduit. The conduit shall be round and free of kinks when fed into the plow and placed in the ground. Pulling of the conduit within the plowed cavity will not be allowed.

- Where another circuit is plowed in parallel to the first, the distance between the two shall not be less than 1 foot nor more than 2 feet.

- Conduit shall be installed with the use of an auger. Conduit in the subgrade of the proposed improvement shall extend a minimum of 2 feet beyond the edge of proposed pavement, stabilized shoulder, or paved median.

- Areas disturbed by the augering operation shall be restored to their original condition as directed by the Engineer.

GENERAL

- Coilable non-metallic conduit larger than 3 inches shall be machine straightened to remove the longitudinal curvature and ovality caused by coiling the conduit onto reels. The conduit straightening process shall not deform the cross-section of the conduit. Straight sticks of non-metallic conduit may be provided in lieu of Coilable as long as the straight sticks meet the specifications here within and coupled following the Illinois Tollway standard details.

- Conduit test procedures and test results shall meet the requirements of NEMA Standard No. TC 7 and ASTM F2160 Sections 4 and 5. Certified copies of the test report shall be submitted to the Engineer prior to the installation of the conduit.

- Fiber optic conduit runs shall not exceed 90-degrees of total deflection.

- All conduits shall be cleaned by wire brush mandrel to remove all dirt and other foreign materials and install compression plugs on both end of the conduit until conductors are installed. The Contractor shall record the results on the Conduit Test form attached to this special provision and provide it to the Engineer for review and acceptance. After the form is signed by both the Contractor, the Engineer, and the Corridor Construction Manager (If applicable) it should be uploaded into the WBPM system.

- The Contractor shall proof all conduits with a solid aluminum mandrel, as per the Table below. Any failed conduits shall be repaired and tested again. The Contractor shall record the results on the Conduit Test form attached to this special provision and provide it to the Engineer for review and acceptance. After the form is signed by both the Contractor and the Engineer, it should be uploaded into the WBPM system.

Conduit Size (in)	Mandrel Diameter (in)	Minimum Mandrel Length (in)	Maximum Mandrel Length (in)
1	0.60	1.0	4
1 ¼	0.86	1.5	4
1 ½	1.12	1.8	4
2	1.62	2.4	6
3	2.5	3.25	8
4	3.5	4.25	8
6	5.5	6.25	10

- The Contractor shall perform the conduit proofing in the presence of the Engineer. The Contractor shall apply a pressure of 100 – 110 psi to the conduit, close the air output valve and stop compressor, and measure air pressure loss. The maximum allowable air pressure loss within 2 minutes of pressurization is 20 psi. The Contractor shall record the results on the Conduit Test form attached to this special provision and provide it to the Engineer for review and acceptance. After the form is signed by both the Contractor and the Engineer, it should be uploaded into the WBPM system.
- The contractor shall repeat the above testing procedures only on conduits encased in the duct package (**DUCT PACKAGE, CONDUIT ENCASED, CLSM)** and after the conduit system has been completed. The Contractor shall record the results on the Conduit Test form attached to this special provision and provide it to the Engineer for review and acceptance. After the form is signed by both the Contractor and the Engineer, it should be uploaded into the WBPM system.
- Underground cable marking tape shall be installed in accordance with Article 810.04 (a) of the Standard Specifications.

Method of Measurement. This work will be measured for payment in feet installed and accepted.

Basis of Payment. This work will be paid for at the contract unit price per foot for INSTALL UNDERGROUND CONDUIT, COILABLE NONMETALLIC CONDUIT, SDR 11 of the size specified.

Pay Item Number	Designation	Unit of Measure
JT810502	INSTALL UNDERGROUND CONDUIT, COILABLE NONMETALLIC, SDR 11, 1 1/2" DIA.	FOOT

JT810510	INSTALL UNDERGROUND CONDUIT, COILABLE NONMETALLIC, SDR 11, 6" DIA.	FOOT

DUCT PACKAGE, CONDUIT ENCASED, CLSM (CTS V 1.5)

Description. This work shall consist of furnishing and installing all material and labor necessary to arrange conduits in a duct package and then cover with Controlled-Low Strength Material (CLSM) to protect the conduits as shown in the Plans. This work shall not include the installation of the conduit.

Materials. Materials shall be according to the following section of the Standard Specifications:

	Item	Article/Section
a)	Controlled Low-Strength Material (CLSM)	1019
b)	Fine Aggregate	1003.04

CONSTRUCTION REQUIREMENTS

Multiple conduit runs grouped together in a duct package as shown in the Plans shall be encased in CLSM and shall be supported on interlocking plastic spacers designed for the purpose, spaced along the length of the run as recommended by the manufacturer. Spacing between raceways within a common duct package shall be a minimum of 2 in. The interlocking spacers shall be used at a maximum interval of 5 ft for 30 feet prior and after a joint only. The spacers shall be installed on top of 3 in. of fine aggregate backfill covering the bottom of the duct package trench. CLSM cover overall shall be a minimum of 3 in. all around the conduits to be encased.

During CLSM placement there shall be no voids, the spacers shall be undisturbed, and the conduit joints shall stay secure and unbroken. CLSM shall be deflected during placement to minimize the possible damage to or movement of the conduits.

All conduit joints and supports shall be inspected and approved by the Engineer before the CLSM is poured. Backfilling around the duct package shall use Fine Aggregate.

Method of Measurement. This work will be measured for payment in feet in place. Measurements will be made in straight lines along the Centerline of the duct package between ends and changes in direction. Changes in direction will assume perfect straight line runs, ignoring actual raceway sweeps.

Basis of Payment. This work will be paid for at the contract unit price per foot for DUCT PACKAGE, CONDUIT ENCASED of the diameter and number of raceways.

Interlocking spacers will not be paid for separately but shall be included in the unit price of the duct package.

Trenching and backfilling for the duct package shall not be paid for separately but shall be included in the unit price of the duct package

Conduits will be paid separately.

TO
CONTRACT REQUIREMENTS
FOR CONTRACT I-20-4517
ILLINOIS STATE TOLL HIGHWAY AUTHORITY

Date: 7/21/2020

For which proposals will be received by the Illinois State Toll Highway Authority at its offices, 2700 Ogden Avenue, Downers Grove, Illinois 60515 until 10:30:00 A.M. local time, **August 7, 2020.**

NOTICE OF REVISION TO CONTRACT

NOTES:

1. A complete set of Schedule of Prices is included with this Addendum and must be inserted into the Contract Bid by the Bidder. The Bidder's attention is called to pages P-5R, P-9R through P-13R, P-15R, P-17R, P-18R, P-20R through P-22R, P-25R, P-26R, P-28R, P-29R, P-32R, P-36R through P-38R, P-42R, P-44R and P-45R which have been revised and included as part of the Schedule of Prices.

2. The following revised Special Provision pages are included in the Contract with this Addendum: J-iR, J-iiR, J-ivR, J-viR, J-viiiR, J-xiR through J-xiiiR, J-12R, J-26R, J-27R, J-111R, J-112R, J-121R, J-122R, J-287R, J-663R through J-672R, CC-23R through CC-25R, CC-35R, CC-49R, and CC-93R.

3. The following new Special Provision pages are included in the Contract with this Addendum: J-116A, J-116B, J-521A, J-672A, and CC-210 through CC-214.

4. The following Special Provision pages were deleted from the Contract by this Addendum: CC-10, CC-65, CC-66, CC-84, CC-85, CC-88, and CC-89.

5. The following revised Contract Drawings are included in this Addendum:
   Volume 1 – Drawings 18, 19, 21, 29, 51, 61, 62, 180, 217, 249, 260 through 266, 276
   Volume 2 – Drawings 502, 504, 509, 510, 513
   Volume 3 – Drawings 629, 631, 634 through 636, 763
   Volume 5 – Drawings 1086, 1088, 1092 through 1095, 1098 through 1102, 1112, 1114, 1115, 1117, 1118, 1120 through 1131, 1147, 1150, 1156 through 1160, 1162 through 1168, 1170 through 1178, 1180 through 1188, 1190 through 1193, 1195, 1198, 1209, 1211, 1212, 1217, 1225
   Volume 7 – Drawings 1574, 1603 through 1605, 1607, 1608

6. The following new Contract Drawings are included in this Addendum:
   Volume 1 – Drawings 62A, 293A

7. Revised Contract Drawings 9 through 17 will be issued to the successful Bidder. The revised drawings will reflect the quantity changes shown in the "Summary of Revisions to Pay Item Quantities" table included in this addendum.

8. The following revised Contract Drawings will be issued to the successful Bidder.
   Volume 1 – Drawings 5, 279, 285, 288
   Volume 2 – Drawing 297
   Volume 3 – Drawings 606, 675, 759
   Volume 4 – Drawings 861, 880, 885, 888, 896, 905, 926, 927, 947, 952, 956, 960, 962, 963, 974, 982, 985, 1005, 1006, 1024, 1027, 1028, 1030, 1031, 1034, 1036, 1054, 1055
   Volume 5 – Drawing 1085
   Volume 6 – Drawing 1275
   Volume 7 – Drawing 1573

9. A new reference document has been posted to the Online Plan Room: Revised Preliminary Site Investigation Report, W. 87th Street and S. Roberts Road, June 19, 2020.

10. The minutes and sign-in sheet from the Optional Pre-Bid Meeting held on June 29, 2020 are included in this Addendum.

11. Responses to Request for Information received from the Plan Holders are included in this Addendum.

Change #1 Contract Requirements, Volume I, pages P-5, P-9 through P-13, P-15, P-17, P-18, P-20 through P-22, P-25, P-26, P-28, P-29, P-32, P-36 through P-38, P-42, P-44 and P-45 replaced with pages P-5R, P-9R through P-13R, P-15R, P-17R, P-18R, P-20R through P-22R, P-25R, P-26R, P-28R, P-29R, P-32R, P-36R through P-38R, P-42R, P-44R and P-45R. These replacements contain the following revisions (attached):

1.1. Revised designation for pay item number 20201200.
1.2. Revised unit of measure for 999ADJ20, 999ADJ21, 999ADJ22, 999ADJ23, 999ADJ24, 999ADJ25
1.3. Moved item X1400216 to correct location by pay item number
1.4. Revised quantities as noted in the SUMMARY OF REVISIONS TO PAY ITEMS QUANTITIES.
1.5. Added the pay item for TOPSOIL EXCAVATION AND PLACEMENT (21101505).
1.6. Added the pay item for STORM SEWERS, CLASS A, TYPE 1 EQUIVALENT ROUND-SIZE 48" (550A4710).
1.7. Added the pay item for STORM SEWERS, CLASS A, TYPE 2 EQUIVALENT ROUND-SIZE 30" (550A5100).
1.8. Added the pay item for STORM SEWERS, CLASS A, TYPE 2 EQUIVALENT ROUND-SIZE 36" (550A5300).
1.9. Deleted the pay item for STORM SEWERS, CLASS A, TYPE 2 EQUIVALENT ROUND-SIZE 48" (550A5510).
1.10. Deleted the pay item for RAISED REFLECTIVE PAVEMENT MARKER (78100100).
1.11. Added the pay item for HEAVY-DUTY HANDHOLE (81400200).
1.12. Deleted the pay item for PAINT NEW TRAFFIC SIGNAL POST (85100500).
1.13. Deleted the pay item for PAINT NEW MAST ARM AND POLE, UNDER 40 FOOT (85100600).
1.14. Added the pay item for TRANSCEIVER – FIBER OPTIC (86400100).
1.15. Deleted the pay item for ELECTRIC CABLE IN CONDUIT, SERVICE, NO. 2-2 C (87301790).
1.16. Deleted the pay item for TRAFFIC SIGNAL POST, 10 FT. (87500600).
1.17. Added the pay item for PEDESTRIAN PUSH-BUTTON (88800100).
1.18. Deleted the pay item for RELOCATE EXISTING EMERGENCY VEHICLE PRIORITY SYSTEM, DETECTOR UNIT (89501400).
1.19. Deleted the pay item for RELOCATE EXISTING EMERGENCY VEHICLE PRIORITY SYSTEM, PHASING UNIT (89501410).
1.20. Added the pay item for PEDESTRIAN SIGNAL POST, 10 FT. (X1400367).
1.21. Deleted the pay item for FULL-ACTUATED CONTROLLER IN EXISTING CABINET (X8570215).
1.22. Deleted the pay item for ACCESSIBLE PEDESTRIAN SIGNALS (X8760200).
1.23. Added the pay item for CONCRETE FOUNDATION, TYPE A 10-INCH DIAMETER (X8780010).
1.24. Added the pay item for STORM SEWER (WATER MAIN REQUIREMENTS) 18 INCH (Z0056612).
1.25. Deleted the pay item for CATCH BASINS, TYPE G-5, TYPE 20A FRAME AND GRATE (JI602143).
1.26. Added the pay item for CONDUIT ATTACHED TO STRUCTURE, 2" DIA., PVC COATED GALVANIZED STEEL (JS811060).
1.27. Added the pay item for CONTRACT ALLOWANCE FOR SPECIAL NOISE ABATEMENT WALL (JT154046).

CHANGES TO THE CONTRACT SPECIAL PROVISIONS

Change #2 Contract Requirements, Volumes II and III, replace pages J-i, J-ii, J-iv, J-vi, J-viii and J-xi through J-xiii with pages J-iR, J-iiR, J-ivR, J-viR, J-viiiR and J-xiR through J-xiiiR. These replacements contain the following revision (attached):

2.1. Updated Table of Contents to show new special provisions pages added as part of this addendum and revised page numbers for revised special provisions as part of this addendum.

Change #3 Contract Requirements, Volume II, replace page J-12 with page J-12R. This replacement contains the following revision (attached):

3.1. Revised Illinois Tollway Standard Drawing revision number for Noise Abatement Walls to latest revision.

Change #4 Contract Requirements, Volume II, replace pages J-26 and J-27 with pages J-26R and J-27R. These replacements contain the following revisions (attached):

4.1. Added projects for coordination with other contractors: Fiber Material Acquisition, Permanent Lighting Material Acquisition, Temporary Lighting Material Acquisition, 88th/Cork Ave at I-294 Interchange, Harlem Ave at 95th St Interchange.
4.2. Corrected contract numbers for Mile Long Bridge projects.

Change #5 Contract Requirements, Volume II, replace pages J-111 and J-112 with pages J-111R and J-112R. These replacements contain the following revision (attached):

5.1. Added parcel ID's TW-3A-16-084 through TW-3A-16-092 with projected acquisition date 1/3/2023, for temporary easements for driveway apron construction along 87th Street and Roberts Road.

Change #6 Contract Requirements, Volume II, add the following sheets J-116A and J-116B (attached):

6.1. Add the Special Provision for Contract Compliance (Illinois Tollway)

Change #7 Contract Requirements, Volume II, replace pages J-121 and J-122 with pages J-121R and J-122R. These replacements contain the following revision (attached):

7.1. Revised the Special Provision for Earth and Rock Excavation to define "unsuitable material."

Change #8 Contract Requirements, Volume II, replace page J-287 with page J-287R. This replacement contains the following revision (attached):

8.1. Revised pay item designation to remove pay item number JI602143.

Change #9 Contract Requirements, Volume II, add the following sheet J-521A (attached):

9.1. Add the Special Provision for Allowance for Noise Abatement Wall Construction

Change #10 Contract Requirements, Volume II, replace pages J-663 through J-672 with pages J-663R through J-672R and J-672A. This replacement contains the following revision (attached):

10.1. Revised special provision for PRECAST CONCRETE NOISE ABATEMENT WALL (Illinois Tollway GBSP).

Change #11 Contract Requirements, Volume III, replace page CC-10 with page CC-10R. This replacement contains the following revision (attached):

11.1. Deleted special provision for RAISED REFLECTIVE PAVEMENT MARKER.

Change #12 Contract Requirements, Volume III, replace pages CC-23 through CC-25 with pages CC-23R through CC-25R. These replacements contain the following revision (attached):

12.1. Revised pay items applicable to SP for TRAFFIC SIGNAL WORK GENERAL.

Change #13 Contract Requirements, Volume III, replace page CC-35 with page CC-35R. This replacement contains the following revision (attached):

13.1. Revised pay items applicable to SP for TRAFFIC SIGNAL POST AND PEDESTRIAN PUSH-BUTTON POST.

Change #14 Contract Requirements, Volume III, replace page CC-49 with page CC-49R. This replacement contains the following revision (attached):

14.1. Revised pay items applicable to SP for HANDHOLE.

Change #15 Contract Requirements, Volume III, replace page CC-65 with page CC-65R. This replacement contains the following revision (attached):

15.1. Deleted special provision for RELOCATE EXISTING EMERGENCY VEHICLE PRIORITY SYSTEM, DETECTOR UNIT.

Change #16 Contract Requirements, Volume III, replace page CC-66 with page CC-66R. This replacement contains the following revision (attached):

16.1. Deleted special provision for RELOCATE EXISTING EMERGENCY VEHICLE PRIORITY SYSTEM, PHASING UNIT.

Change #17 Contract Requirements, Volume III, replace pages CC-84 and CC-85 with pages CC-84R and CC-85R. These replacements contain the following revision (attached):

17.1. Deleted special provision for ACCESSIBLE PEDESTRIAN SIGNALS.

Change #18 Contract Requirements, Volume III, replace pages CC-88 and CC-89 with pages CC-88R and CC-89R. These replacements contain the following revision (attached):

18.1. Deleted special provision for TRAFFIC SIGNAL PAINTING.

Change #19 Contract Requirements, Volume III, replace page CC-93 with page CC-93R. This replacement contains the following revision (attached):

19.1. Revised pay items applicable to SP for STORM SEWER (WATER MAIN REQUIREMENTS).

Change #20 Contract Requirements, Volume III, add the following sheets CC-210 through CC-214 (attached):

20.1. Add the Special Provision for Concrete Foundation, Pedestrian Post.
20.2. Add the Special Provision for Pedestrian Push-Button.
20.3. Add the Special Provision for Pedestrian Signal Post.

CHANGES TO THE CONTRACT DRAWINGS

Change #21 Contract Plans, Volume 1, Drawing 5; Contract Plans, Volume 2, Drawing 297; Contract Plans, Volume 3, Drawing 606; Contract Plans, Volume 4, Drawing 861; Contract Plans, Volume 5, Drawing 1085; Contract Plans, Volume 6, Drawing 1275; Contract Plans, Volume 7, Drawing 1573. Summary of Quantities. These drawings contain the following revision (issued to successful Bidder):

21.1. Revised Illinois Tollway Standard Drawing revision number for Noise Abatement Walls (G12, G13, G14, G15, G16) to latest revision.

Change #22 Contract Plans, Volume 1, Drawings 9 through 17. Summary of Quantities. These drawings contain the following revision (issued to successful Bidder):

22.1. Revised quantities to reflect quantity changes shown in the “Summary of Revisions to Pay Items Quantities” table included in this addendum.

Change #23 Contract Plans, Volume 1, Drawings 18, 19 and 21. Schedule of Quantities. These drawings contain the following revisions (attached):

23.1. Added excavation and embankment volumes to account for estimated over-excavation of existing Zone B embankment material.
23.2. Revised calculation of suitable topsoil stripping and topsoil balance.
23.3. Revised notes for earthwork schedule.

Change #24 Contract Plans, Volume 1, Drawing 29. Schedule of Quantities. This drawing contains the following revision (attached):

24.1. Added quantity schedule for sleeper slabs associated with roadway plans.

Change #25 Contract Plans, Volume 1, Drawing 51. HMA Mix Table. This drawing contains the following revision (attached):

25.1. Added mixes for pavement patching.

Change #26 Contract Plans, Volume 1, Drawings 61 and 62. MOT Schedule of Quantities. These drawings contain the following revision (attached):

26.1. Revised quantity schedules for Impact Attenuators and Relocate Temporary Concrete Barrier for addition of Pre-Stage.

Change #27 Contract Plans, Volume 1, Drawing 62A. Maintenance of Traffic Pre-Stage. This new drawing contains the following revision (attached):

27.1. Added Pre-Stage plan to construct slotted drains at north crossover and SB median.

Change #28 Contract Plans, Volume 1, Drawing 180. Roadway Detail. This drawing contains the following revision (attached):

28.1. Revised pay item number for Concrete Median Barrier Transition at ATM Gantry.

Change #29 Contract Plans, Volume 1, Drawing 217. Temporary Drainage Schedule. This drawing contains the following revision (attached):

29.1. Revised slotted drains to be cleaned schedule and quantities.

Change #30 Contract Plans, Volume 1, Drawing 249. Drainage Removal Schedule. This drawing contains the following revision (attached):

30.1. Revised slotted drain removal schedule and quantities.

Change #31 Contract Plans, Volume 1, Drawings 260 through 262. Drainage Structure Schedule. These drawings contain the following revision (attached):

31.1. Revised schedule for drainage structure types and rim and invert elevations.

Change #32 Contract Plans, Volume 1, Drawings 263 through 265. Drainage Pipe Schedule. These drawings contain the following revision (attached):

32.1. Revised schedule for storm sewer pipe slopes, sizes, and types, and trench backfill.

Change #33 Contract Plans, Volume 1, Drawing 266. Miscellaneous Drainage Schedule. This drawing contains the following revision (attached):

33.1. Revised schedule to eliminate S906.

Change #34 Contract Plans, Volume 1, Drawing 276. Drainage Plan. This drawing contains the following revision (attached):

34.1. Revised plan to eliminate S906.

Change #35 Contract Plans, Volume 1, Drawing 279. Drainage Profile - Median. This drawing contains the following revision (issued to successful Bidder):

35.1. Revised storm sewer profiles for P402 through P407.

Change #36 Contract Plans, Volume 1, Drawings 285 and 288. Drainage Profile – SB Shoulder. These drawings contain the following revision (issued to successful Bidder):

36.1. Revised storm sewer profiles in accordance with other changes included with this Addendum.

Change #37 Contract Plans, Volume 1, Drawing 293A. Drainage Details. This new drawing contains the following revision (attached):

37.1. Added slotted drain details and schedule.

Change #38 Contract Plans, Volume 2, Drawing 502. ITS Legend. This drawing contains the following revisions (attached):

38.1. Added legend item K for conduit attached to structure.

38.2. Updated pay item code for items A, B, C, E, E1, E2, F and G.

Change #39 Contract Plans, Volume 2, Drawing 504. ITS Summary of Quantities. This drawing contains the following revision (attached):

39.1. Revised quantity summary for conduit attached to structure.

Change #40 Contract Plans, Volume 2, Drawings 509 and 510. Proposed ITS Plans. These drawings contain the following revision (attached):

40.1. Added detail, notes and callouts for conduit attached to underside of proposed bridge over 87^{h} Street and Roberts Road.

Change #41 Contract Plans, Volume 2, Drawing 513. Proposed ITS Plans. This drawing contains the following revision (attached):

41.1. Deleted note 1.

Change #42 Contract Plans, Volume 3, Drawings 629, 631, 634 through 636. Substructure Removals. These drawings contain the following revision (attached):

42.1. Revised limits of substructure removal and pile removal.

Change #43 Contract Plans, Volume 3, Drawings 675 and 759. Steel Details. These drawings contain the following revision (issued to successful Bidder):

43.1. Revised select values in girder moment table and notes.

Change #44 Contract Plans, Volume 3, Drawing 763. Steel Details. This drawing contains the following revision (attached):

44.1. Revised details related to 4" dia. standard pipe for traffic signal equipment.

Change #45 Contract Plans, Volume 4, Drawings 880, 885, 888, 896, 905, 926, 927, 947, 952, 956, 960, 962, 963, 974, 982, 985, 1005, 1006, 1024, 1027, 1028, 1030, 1031, 1034, 1036, 1054, 1055. Retaining Walls. These drawings contain the following revision (issued to successful Bidder):

45.1. Revised bar callouts on plan and section views.

Change #46 Contract Plans, Volume 5, Drawings 1086 and 1088. Noise Abatement Wall TS17.60N,NB(R). These drawings contain the following revisions (attached):

46.1. Added note for optional panel sizes.

46.2. Added dimension for maximum height difference between proposed grades at front and back face of noise abatement wall.

Change #47 Contract Plans, Volume 5, Drawings 1092 through 1095. Noise Abatement Wall TS17.60N,SB(R). These drawings contain the following revision (attached):

47.1. Revised panels, schedules and quantities for noise abatement wall TS17.60N,SB(R).

Change #48 Contract Plans, Volume 5, Drawings 1098 through 1102. Noise Abatement Wall TS17.70N,SB. These drawings contain the following revision (attached):

48.1. Revised top of wall, schedules and quantities for noise abatement wall TS17.70N,SB.

Change #49 Contract Plans, Volume 5, Drawings 1112, 1114, 1115, 1117, 1118, 1120 through 1131. Noise Abatement Wall TS17.75N,SB. These drawings contain the following revisions (attached):

49.1. Revised top of wall elevations for first two sections and last section of noise abatement wall TS17.75N,SB.

49.2. Revised panels, schedules and quantities for all sections of noise abatement wall TS17.75N,SB.

Change #50 Contract Plans, Volume 5, Drawings 1147 and 1150. Noise Abatement Wall TS17.80N,NB. These drawings contain the following revisions (attached):

50.1. Added note for optional panel sizes.

50.2. Added dimension for maximum height difference between proposed grades at front and back face of noise abatement wall.

Change #51 Contract Plans, Volume 5, Drawings 1156 through 1160, 1162 through 1164. Noise Abatement Wall TS18.40N,NB. These drawings contain the following revision (attached):

51.1. Revised top of wall elevations, panels, schedules and quantities for sections of noise abatement wall TS18.40N,NB.

Change #52 Contract Plans, Volume 5, Drawings 1165 through 1168, 1170 through 1172. Noise Abatement Wall TS18.40N,SB. These drawings contain the following revision (attached):

52.1. Revised top of wall elevations, panels, schedules and quantities for sections of noise abatement wall TS18.40N,SB.

Change #53 Contract Plans, Volume 5, Drawings 1173 through 1178, 1180 through 1183. Noise Abatement Wall TS18.80N,NB. These drawings contain the following revision (attached):

53.1. Revised top of wall elevations, panels, schedules and quantities for sections of noise abatement wall TS18.80N,NB.

Change #54 Contract Plans, Volume 5, Drawings 1184 through 1188, 1190 through 1193. Noise Abatement Wall TS18.80N,SB. These drawings contain the following revision (attached):

54.1. Revised top of wall elevations, panels, schedules and quantities for sections of noise abatement wall TS18.80N,SB.

Change #55 Contract Plans, Volume 5, Drawings 1195 and 1198. Noise Abatement Wall TS19.10N,NB. These drawings contain the following revisions (attached):

55.1. Added note for optional panel sizes.

55.2. Added dimension for maximum height difference between proposed grades at front and back face of noise abatement wall.

Change #56 Contract Plans, Volume 5, Drawings 1209, 1211, 1212. Noise Abatement Wall TS19.10N,SB. These drawings contain the following revisions (attached):

56.1. Revised schedules and quantities for noise abatement wall TS19.10N,SB.

Change #57 Contract Plans, Volume 5, Drawings 1217 and 1225. Noise Abatement Wall TS19.20N,SB. These drawings contain the following revisions (attached):

57.1. Added note for optional panel sizes.

57.2. Added dimension for maximum height difference between proposed grades at front and back face of noise abatement wall.

Change #58 Contract Plans, Volume 7, Drawing 1574. Roberts Road and 87th Street Earthwork Schedule. This drawing contains the following revision (attached):

58.1. Revised earthwork schedule.

Change #59 Contract Plans, Volume 7, Drawings 1603 through 1605, 1607, 1608. Roberts Road and 87 h Street Removal Plan. These drawings contain the following revision (attached):

59.1. Added note providing reference to locations for topsoil striping for new pay item TOPSOIL EXCAVATION AND PLACEMENT, per Standard Specifications Section 211.

Reference Permit Number 18-09-8329-C

The Contractor is required to execute permit forms and provide a bond to Cook County to secure a Highway Permit for access to the Cook County right-of-way for the purpose of performing the contract work. The bond shall be furnished in the amount of $20,000.00. The Contractor is required to meet all insurance requirements necessary for Cook County permits. For additional information:

https://www.cookcountyil.gov/service/construction-permits-online-payment

S.P. 106.3 COORDINATION WITH OTHER CONTRACTORS

The Contractor is advised that certain operations will involve cooperation with Illinois Tollway personnel and Contractors performing work on or adjacent to this contract for the Illinois Tollway. The Contractor shall cooperate to the fullest extent with the Illinois Tollway and the Contractors working on adjacent projects in compliance with the provisions of Article 105.08 of the Illinois Tollway Supplemental Specifications.

The following Illinois Tollway projects in the vicinity of Contract I-20-4517 may be under construction during the term of this Contract:

- I-18-4430 Roadway and Bridge Reconstruction, Northbound Mile Long Bridge Construction, Tri-State Tollway (I-294)
- I-18-4431 Roadway and Bridge Reconstruction, Bridge Demolition and Southbound Mile Long Bridge Construction, Tri-State Tollway (I-294)
- I-19-4481 Tri-State Tollway Roadway and Bridge Reconstruction, Archer Avenue (IL-171) Interchange
- I-19-4506 Tri-State Tollway Shoulder Rehabilitation and Traffic Crossover Construction, 95th Street to LaGrange Rd
- I-20-4518 Tri-State Tollway Roadway Reconstruction, Plazas 36 and 39 to LaGrange Rd
- I-20-4513 Tri-State Tollway Fiber Material Acquisition
- I-20-4542 Tri-State Tollway Permanent Lighting Material Acquisition
- I-19-4508 Tri-State Tollway Temporary Lighting Material Acquisition

The following Cook County projects in the vicinity of Contract I-20-4517 may be under construction during the term of this Contract:

- Section 19-B4224-00-BR, 87th Street Bridge over Baltimore & Ohio Chicago Terminal Railroad, Deck Replacement and Repairs
- Section 19-W3019-00-PV, 88th/Cork Avenue at I-294 Interchange, Roadway Reconstruction and Ramp Construction

The following IDOT projects in the vicinity of Contract I-20-4517 may be under construction during the term of this Contract:

- Harlem Avenue (IL-43) Roadway Resurfacing, 52nd Street to 111th Street
- Harlem Avenue (IL-43) at 95th St (US-20) Interchange Reconstruction
- LaGrange Road (US-12/20/45) Bridge over Santa Fe Drive, Sanitary & Ship Canal, I&M Canal and Illinois Central Railroad, Deck Replacement and Repairs

S.P. 106.4 COORDINATION WITH THE VILLAGE OF JUSTICE

For construction on or adjacent to any Village roadways, the Contractor will be required to contact the Village of Justice, as listed below, to notify them one week prior to construction of any work in or adjacent to their right of way or utilities.

Joe Cekus
8748 West 82nd Place
Justice, IL 60458

S.P. 106.5 COORDINATION WITH THE CITY OF HICKORY HILLS

The City of Hickory Hills should be notified 48-hours prior to any construction activity that could potentially cause damage to their existing infrastructure. A representative from the City of Hickory Hills should be present during these construction activities in order to quickly identify damage or breakage to the existing water main, request immediate shutdown of the construction operations, and properly isolate the damaged main.

The contractor should implement precautionary measures to reduce the potential for damage to the existing adjacent infrastructure within the area. Construction vehicles shall be prohibited from crossing the City of Hickory Hills water main except at designated crossings at existing access roads where the contractor shall utilize protection pads (land bridges) to ensure that construction traffic will not produce any live load that exerts pressure to soils surrounding the utility, or as approved by the engineer. Drawings, bearing pressure calculations and stress calculations shall be submitted to the Engineer for approval, a minimum of 21 days prior to applying any loadings to the utility. Any subsurface investigations necessary to generate the design submittal shall be coordinated in accordance with S.P. 106.

Sue Lehr
770 W 98th Street
Hickory Hills, IL 60457

S.P. 106.6 COORDINATION WITH THE VILLAGE OF BRIDGEVIEW

For construction on or adjacent to any Village roadways or sanitary sewers, the Contractor will be required to contact the Village of Bridgeview, as listed below, to notify them one week prior to construction of any work in or adjacent to their right of way or utilities.

Pat Barker
7500 S. Oketo Ave.
Bridgeview, IL 60455

work only within available right-of-way, and shall prepare revised Baseline Schedule(s) in compliance therewith as directed by the Engineer.

The final configuration of the Project Right-of-Way requires the acquisitions of several land parcels. This listing identifies these individual parcels and provides the acquisition status. The Contractor's bid proposal shall have been submitted with the understanding that access to the proposed right-of-way and easements will be provided no earlier that the date indicated in the "Projected Acquisition Date" column in the table below.

Parcel ID #	Projected Acquisition Date	Actual Acquisition Date

The Contractor is hereby advised that existing homes, billboards, sheds, and other permanent above-ground structures within the limits of the proposed ROW on the parcels listed above will be removed by others, unless noted otherwise on the plans.

However, the Illinois Tollway reserves the right not to issue the Notice to Proceed until sufficient right-of-way, as deemed by the Engineer, is available for commencement of the Work. In any event, there shall be no damages or additional compensation due to the Contractor for delays due to delay in furnishing the right-of-way, and the Contractor's sole remedy, where applicable, shall be an extension of time.

S.P. 119 AVAILABLE GEOTECHNICAL INFORMATION

The following is a listing of the geotechnical reports prepared by Geo Services, Inc. or GEI Consultants, Inc. that are available for review in the Illinois Tollway on-line plan room.

CONTRACT COMPLIANCE (Illinois Tollway)

Effective: June 19, 2020

The following Articles of the Illinois Tollway Supplemental Specifications are revised as follows.

Revise Article 107.01(e) and Article 107.01(f) to read as follows:

(e) DBE Utilization Program. The Illinois Tollway has instituted a best efforts affirmative action program to encourage Contractors to increase the participation of disadvantaged business enterprises (DBE) on Illinois Tollway projects. The Illinois Tollway's goals are set forth in the Proposal and the Special Provision for Disadvantage Business Enterprises Participation which is part of the Contract Documents. The Illinois Tollway encourages contractors to make a best effort to achieve the Illinois Tollway's goals. Contractors and subcontractors must meet their requirements and should contact the Tollway's Diversity Department during the life of the project if they experience challenges in meeting their DBE hiring goals. Documentation of their goals shall be in the form prescribed by the Diversity Department.

(f) Veteran Owned Small Business (VOSB) Program. A VOSB is a business certified by the State of Illinois Department of Central Management Services (CMS) as a Veteran-owned small business or Service-disabled Veteran-owned small business. The VOSB program is separate and distinct from the DBE program. A single firm may not participate in a single project as both a VOSB and DBE firm. The Illinois Tollway has created a Partnering for Growth Program and guidelines for Veteran Owned Small Businesses (VOSBs) and encourages firms providing professional services to review the Program requirements set forth in the Proposal and the Special Provision for Veterans Small Business Participation and Utilization Plan-Construction to assist the Illinois Tollway in achieving its goals. Contractors and subcontractors must meet their requirements and should contact the Tollway's Diversity Department during the life of the project if they experience challenges in meeting their VOSB hiring goals. Documentation of their goals shall be in the form prescribed by the Diversity Department.

Revise the first paragraph of Article 109.07 to read as follows:

At least once each month the Engineer will make an approximate estimate, in writing, of the materials in place and completed, the amount of work performed, and the value thereof, at the Contract unit prices. From the amount so determined there shall be deducted 10 percent to be retained until after the completion of the entire work to the satisfaction of the Engineer, and the balance certified to the Illinois Tollway for payment, except that no amount less than $500.00 will be so certified unless the total amount of the Contract is less the $500.00. Contractors and subcontractors are required to submit partial lien waivers for all pay estimate and retainage payment applications prior to contract completion, and final waivers of lien and sworn statements for final pay estimate and final retainage requests. Partial and final lien waivers and sworn statements in support of pay estimates and retainage release requests shall be uploaded through the B2gNow system, eliminating the need for the submission of paper documents. Payments to prime

contractors by the Illinois Tollway are automatically transferred into the B2gNow system no later than the 8 h of the month for the prior month. Prime contractors have until the 15th of the month to report payments they made to their subcontractors; and subcontractors have until the 25th of the month to confirm payments the prime contractors reported for them. Contractor and subcontractor waivers of lien will be allowed to trail for a maximum of sixty (60) days if necessary. Otherwise waivers of lien and sworn statements are submitted with each pay estimate or retainage release request through the B2gNow system. Notwithstanding the above, after 50 percent or more of The Work is completed, the remaining partial payments will be made without any further retention, provided that satisfactory progress is being made in accordance with the Contract requirements and continues to be made, and provided that the amount retained shall not, at any time, be less than 5 percent of the adjusted Contract Award Amount. If at any time, satisfactory progress is not being made in accordance with the Contract requirements, the Chief Engineering Officer may in his sole discretion, require 10 percent of the amount earned to date to be retained until after the completion of the entire work to the satisfaction of the Engineer or until satisfactory progress is made in accordance with the Contract requirements.

Revise Article 109.08(d) to read as follows:

(d)Final Payment Documents. Before final payment is made as provided in Article 109.08, the Contractor shall furnish the Illinois Tollway with the following final payment documents, which forms shall be provided to the Contractor by the Illinois Tollway or submitted through B2gNow:

Consent of Surety to Final Payment

Contractor's Affidavit

Contractors Verified Certificate

Final Waiver of Lien (submitted through B2gNow system)

Guarantee Against Defective Work

Release and Waiver (submitted throughB2gNow system)

The Consent of Surety to Final Payment, Release and Waiver and Guarantee Against Defective Work shall be signed by the Contractor and by a surety satisfactory to the Illinois Tollway.

EARTH AND ROCK EXCAVATION (CTS)
Effective: October 29, 2012
Revised: May 26, 2020

Description. This work shall consist of the excavation and transportation of suitable excavated material to embankment locations throughout the limits of the contract, or the excavation, transportation, and disposal of excavated material according to Section 202 of the Standard Specifications except as modified herein. This work also includes the placement of material at embankment locations in accordance with the Illinois Tollway Special Provision for "Embankment". This work does not include excavation for structures or channel excavation.

Revise Article 202.03 of the Standard Specifications to read:

"202.03 Removal and Disposal of Surplus, Unsuitable Materials, and Organic Waste. Suitable excavated materials of any moisture content shall not be wasted without permission of the Engineer. The Contractor shall dispose of all surplus, unsuitable materials, and organic waste, in such a manner that public or private property will not be damaged or endangered. Suitable but excessively moist excavated materials if used for embankment may be treated in accordance with the Illinois Tollway Special Provision for "Embankment" to obtain the specified compaction levels.

Suitable earth, stones and boulders naturally occurring within the right-of-way may be placed in fills or embankments in lifts and compacted according to Section 205. Reclaimed Asphalt Pavement (RAP) with no expansive aggregate (such as steel slag or blast furnace slag), or uncontaminated dirt and sand generated from construction or demolition activities may be used in embankment or in fill at the approval of the Engineer. RAP shall be utilized in accordance with the Tollway Special Provision for Reclaimed Asphalt Materials (RAM). In areas supporting roadway pavement and structures, the placement of reclaimed asphalt pavement shall only be allowed when ambient air temperature is 40°F and rising. If used in fills or embankments, these materials shall be processed, placed and compacted to the satisfaction of the Engineer; shall be buried under a minimum of 3 feet of earth cover (except when the materials include only uncontaminated dirt); and shall not create an unsightly appearance or detract from the natural topographic features of an area. No material will be allowed for reuse within Tollway right-of-way outside contract limits without prior approval from the Tollway in accordance with Article 107.22 of the Supplemental Specifications.

Excavated Soils are classified for disposal and are also classified for reuse or non-reuse in accordance with the Illinois Tollway Special Provision Disposal of Regulated Substances and Uncontaminated Soils. Soils approved for reuse may be used for Embankment. Aside from the materials listed above, all other construction and demolition debris or waste shall be disposed of in a licensed landfill or otherwise disposed of as allowed by State or Federal laws and regulations.

Organic waste originating within the right-of-way limits may be chipped or shredded and placed as mulch around landscape plantings within the right-of-way when approved by the Engineer. Chipped or shredded material to be placed as mulch shall not exceed a depth of 6 inches.

When the Contractor proposes to dispose of uncontaminated surplus excavated

material off the right-of-way, the Contractor shall obtain and file with the Engineer permission in writing, from the property owner, for the use of the property for this purpose. The approval of the proposed disposal site shall be according to Article 107.22 of the Illinois Tollway Supplemental Specifications. Any such disposal shall not create an unsightly or objectionable appearance or detract from the natural topographic features, nor be placed at an elevation higher than that of the adjacent roadway without permission from the Engineer.

A volume of excavated material from sewer trenches, electrical or ITS trenches, drainage structures, or other underground construction is shown on the plans for information. At the approval of the Engineer, this material may be placed within the right-of-way according to the Illinois Tollway Special Provision for "Embankment". Reuse of excavated material from trenches and drainage, electrical, or fiber structures or other underground construction is classified in accordance with the Illinois Tollway Special Provision for "Disposal of Regulated Substances and Uncontaminated Soil".

If unsuitable material is present at or below the finished grade, it shall be removed and replaced with suitable material as directed by the Engineer. Unsuitable material is any excavated material that does not qualify as Zone A or Zone B embankment according to the Illinois Tollway Special Provision for Embankment."

Revise the first paragraph of Article 202.07(b) to read as follows:

"(b) Measured Quantities. Earth and rock excavation will be measured in their original positions, and the volumes in cubic yards computed by the method of average end areas. The volume of any unsuitable material removed will be measured for payment in cubic yards."

Revise the second paragraph of Article 202.08 to read as follows:

"Removal and disposal of unsuitable material will be paid for at the contract unit price per cubic yard for REMOVAL AND DISPOSAL OF UNSUITABLE MATERIAL."

Revise the fourth paragraph of Article 202.08 to read as follows:

"When the contract does not contain a pay item for removal and disposal of unsuitable material, hazardous waste, or non-special waste disposal (Type 1) and the item is required, it will be paid for according to Article 109.04 of the Illinois Tollway Supplemental Specifications."

Pay Item Number	Designation	Unit of Measure
20200100	EARTH EXCAVATION	CU YD
20201200	REMOVAL AND DISPOSAL OF UNSUITABLE MATERIAL	CU YD

DRAINAGE STRUCTURES FOR STORM SEWER SYSTEMS

Description. This work shall consist of constructing catch basins, manholes, inlets, and drainage structures, together with the necessary cast iron frames and grates or lids, as shown in the Plans or as indicated by the Engineer.

Materials. Materials shall be in accordance with Article 602.02 of the Standard Specifications. The Contractor shall have the option to furnish pre-cast concrete structural elements in accordance with Section 504 of the Standard Specifications, subject to the prior written approval of the Engineer and as noted in the Plans. Shop drawings shall be submitted to the Engineer. The design shall be approved by the Engineer prior to fabrication, construction, or installation.

Construction Requirements. This work shall be completed in accordance with applicable portions of Section 602 of the Standard Specifications, applicable Tollway Standard Drawings, applicable IDOT Highway Standards, and as specified herein. Construction shall conform to Details shown in the Plans, and shall be in accordance with Articles 602.04 and/or 602.07 of the Standard Specifications.

All drainage structures, inlets, manholes, and catch basins shall have a minimum two-foot deep sump between the bottom of the lowest storm sewer invert and the floor of the bottom of the drainage structure, inlet, manhole, junction box or catch basin, unless noted otherwise on the plans.

Method of Measurement. This work will be measured for payment, in place, in units of each, for the various structure types.

Basis of Payment. This work will be paid at the Contract unit price per each of the structure type and frame and grate or lid specified.

Pay Item Number	Designation	Unit of Measure

JI602183	CATCH BASINS, TYPE A, 4'-DIAMETER, TYPE G-3 FRAME AND GRATE	EACH
JI602184	CATCH BASINS, TYPE A, 4'-DIAMETER, TYPE 20A FRAME AND GRATE	EACH
JI602185	CATCH BASINS, TYPE A, 5'-DIAMETER, TYPE 20A FRAME AND GRATE	EACH
JI602190	CATCH BASIN, TYPE G-3 (MODIFIED), TYPE G-3 FRAME AND GRATE	EACH
JI602206	CATCH BASINS, TYPE A, 5'-DIAMETER, TYPE G-3 FRAME AND GRATE	EACH

ALLOWANCE FOR NOISE ABATEMENT WALL CONSTRUCTION

Description. This Special Provision establishes a budgetary allowance for construction of structure-mounted noise abatement walls to heights taller than the maximum allowable height by the Illinois Tollway Standard Drawings for Structure-Mounted Noise Abatement Walls.

The work to be completed under this item will be as detailed in the plans issued by a construction revision to be issued prior to Notice to Proceed. This item will provide a line item against which payment will be made since the scope cannot be fully determined at the time of submittal of the Proposal.

Payment under this allowance will be made for entire wall sections that are constructed to heights greater than the maximum height allowed by the Illinois Tollway Standard Drawings for Structure-Mounted Noise Abatement Walls.

Method of Measurement. This work will not be measured for payment.

Basis of Payment. Payment for this work will be made as specified in Illinois Tollway Supplemental Specifications Article 109.04.

Pay Item Number	Designation	Unit of Measure
JT154046	CONTRACT ALLOWANCE FOR SPECIAL NOISE ABATEMENT WALL	UNIT

PRECAST CONCRETE NOISE ABATEMENT WALL (Illinois Tollway GBSP)

Effective March 30, 2020
Revised July 14, 2020

DESCRIPTION. This work shall consist of the furnishing all material, labor, and equipment necessary to construct a Precast Concrete Noise Abatement Wall at the locations and to the heightslocations, heights, and lengths and details as shown in the Contract Plans, in accordance with the Special Provisions, and the Standard Specifications. The Precast Concrete Noise Abatement Wall type shall be ground mounted, structure mounted, and/or crashworthy ground mounted at the locations shown in the Contract Plans, as described in this Special Provision, and as accepted by the Engineer.

This work shall include the submittal of Shop Drawings,and Working Drawings, erection plans, and furnishing all materials, testing, warranties, labor to fabricate, store and install precast concrete noise abatement wall panels, noise abatement wall posts and assembly accessories as shown in the Contract Plans.

REFERENCED STANDARDS. In addition to the Illinois Department of Transportation Standard Specifications and Supplemental Specifications (latest edition), the following specifications and standards shall govern the fabrication, storage and construction of Precast Concrete Noise Abatement Walls.

The standards and specifications shall be the latest edition as revised to the date of the Advertisement for Bids.

1. AASHTO LRFD Bridge Design Specifications, 8th Edition Dated September 2017.

2. AASHTO Standard Specifications for Transportation Materials and Methods of Sampling and Testing.

3. Illinois Department of Transportation All Geotechnical Manual User Memo 11.1: Light Tower, Traffic Signal, Sign Structure Foundation Design, September 2011.

4. Underwriters Laboratories, Inc. (UL):
    a. Building Materials Directory

5. International Conference of Building Officials (ICBO)

6. International Building Code (IBC), 2018 or latest edition, and State of Illinois amendments, referred to herein as Building Code.

7. United States Department of Transportation (USDOT), Federal Highway Administration (FHA).
    a. Noise Barrier Design Handbook (Report No. FHWA-RD-76-58).

8. National Co-operative Highway Research Program Report 350. (Crashworthiness of Noise Abatement Walls in the roadway clear zone).

9. Precast Prestressed Concrete Institute (PCI) Design Handbook, 8th Edition.

10. Standards promulgated by the ASTM International (ASTM), including item C33, Specification for Concrete Aggregates.

11. Interim Guidelines for the Use of Self Consolidating Concrete in PCI Members (PCI).

12. Illinois Tollway Structure Design Manual, Latest Edition.

Should a conflict occur between the Standard Specifications and another requirement, the Standard Specifications shall govern.

GENERAL REQUIREMENTS. This work shall consist of the design, preparation and submittal of shop drawings (excluding structural calculations), furnishing of all materials, and constructing and installing precast concrete noise abatement wall panels and steel posts and assembly accessories at the locations shown on the Contract Plans. The Contractor's erection plans shall be per the applicable requirements of the Illinois Tollway special provision for "Erection of Girders" and include any special erection requirements from the panel or post supplier.

The Contractor shall verify the location of all existing utilities and structures and shall take all necessary precautions to perform the work in such a manner as to not damage existing utilities or structures, located near or beneath the noise abatement walls. Any damage to existing utilities or structures shall be repaired at no additional cost to the Illinois Tollway.

MATERIALS

Concrete for Drilled Shaft. Concrete in the drilled shaft for the noise abatement wall post shall be in accordance with Section 516.02 of the Standard Specifications.

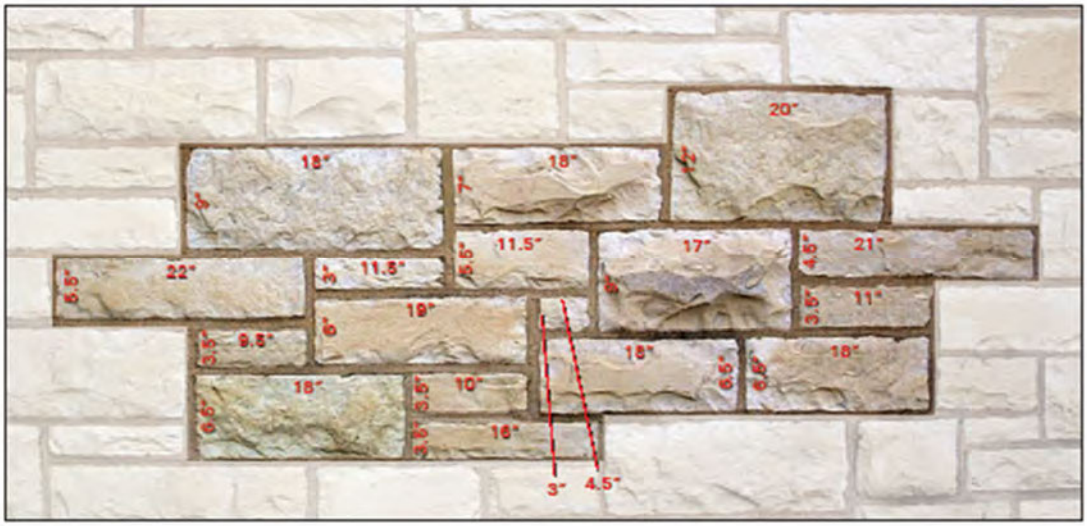
Precast Concrete Panels and Form Liner. Concrete for Precast Concrete Noise Abatement Wall Panels shall conform to the requirements of the applicable portions of Section 1020 of the Standard Specifications. Manufacturer's specifications and mix designs shall be submitted for approval to the Engineer prior to casting Precast Concrete Noise Abatement Wall Panels.

1. The concrete for Precast Concrete Noise Abatement Wall Panels shall be Class PC Portland cement, with a minimum compressive strength of 5,000 psi at 28 days age.

2. The curing methods shall be compatible with the desired aesthetic results.

3. The form liner used to create the random ashlar limestone pattern shall be of high quality and capable of withstanding anticipated concrete pour pressures without causing leakage or causing physical defects. The liner shall be made from high-strength elastomeric urethane material which shall not compress more than 0.02 feet when poured at a rate of 10 vertical feet per hour. The form release agents shall be non-staining, non-residual, and non-reactive.

Precast Concrete Noise Abatement Wall Random Ashlar Limestone Form Liner Pattern.



The Precast Concrete Noise Abatement Wall Panels shall be constructed with a square cut random ashlar rusticated limestone surface with a maximum relief along each side as shown on the details. The panel(s) height selected by the Fabricator should be compatible with Random Ashlar Limestone Form Liner Pattern.

For ground-mounted walls, the maximum architectural aesthetic surface treatment thickness along one side cannot exceed 1½ inches. The relief, on each side of precast concrete panel, is permitted to vary from 0 to 1½ inches, but the total architectural relief thickness, on both sides of the precast concrete panel, must not be greater than 3 inches.

For structure-mounted walls, the maximum architectural aesthetic surface treatment thickness along one side cannot exceed ¾ inches. The relief, on each side of precast concrete panel, is permitted to vary from 0 to ¾ inches, but the total architectural relief thickness, on both sides of the precast concrete panel, must not be greater than 1½ inches.

Angular distortion with regards to panel squareness, defines as the difference between the two diagonals, shall not exceed ½ in. Panel dimensions shall be within ¼ in. all hardware embedded in panels shall be within ¼ in.

The Random Ashlar Limestone pattern shall be continuous for the full height of a wall section, regardless of the number of panels in a wall section. All exposed concrete edges shall have a ¾" chamfer except at horizontal edges between successive panels.

Reinforcing Steel and Welded Wire Fabric. Reinforcing steel shall be in accordance with Article 1006.10 of the Standard Specifications and shall meet the requirements of ASTM A706, Grade 60. Welded wire fabric shall be in accordance with Article 1006.10 of the Standard Specifications.

Structural Steel. Unless otherwise specified, structural steel shall conform to ASTM A709 (ASSHTO M 270) Grade 36, and as specified in Article 1006.04 of the Standard Specifications. Structural steel exposed to weathering shall be hot-dip galvanized in accordance with ASTM A 123 (AASHTO M 111). Weathering Steel (ASTM A588) is not

permitted. Before galvanizing, all surfaces shall be blasted clean as specified in Standard Specification Section 506.07. Grind all cut edges.

Unless otherwise specified, structural steel for attachments and inserts shall conform to ASTM A709 (ASSHTO M 270) Grade 36, or Grade 50, and as specified in Article 1006.04 of the Standard Specifications. Embedded steel for the bottom panel bearing plate shall be hot-dip galvanized in accordance with ASTM A153 (AASHTO M 232).

Lifting Inserts. Lifting inserts shall be galvanized steel and as shown on the Plans or approved equal.

Fire Hydrant Access Door. Fire Hydrant Access Door shall be located per the Plans and shall be Halliday Product Series S1R2424 or an approved equal. The doors shall be modified to include a slam lock to keep the door flush with the Precast Concrete Noise Abatement Wall while closed. The doors and frames shall be galvanized and painted using an Illinois Tollway approved two-coat paint system manufactured by IDOT approved producers. The first coat shall be epoxy polyamide meeting the requirements of Article 1008.05 (d) of the Standard Specifications. The second (final) coat shall be aliphatic urethane meeting the requirements of Article 1008.05 (e) of the Standard Specifications, except the color shall match the color of the precast concrete panel stain Sherwin-Williams 7633, Taupe Tone 248-C4 (#ADA090 Hex Color Code).

Stain & Sealer. For precast concrete panels, a concrete stain and sealer shall be provided and applied to replicate stone with sealer. The base stain color of panels shall match Sherwin-Williams 7633, Taupe Tone 248-C4 (#ADA090 Hex Color Code).

Stains shall be water-based acrylic stain. The staining products must be compatible with the surface sealing coating specified. The Illinois Tollway may waive the requirement of a separate sealing product if the staining product also meets the performance requirements of the sealing product. The sealer shall meet the requirements of Section 1026 of the Standard Specifications except the sealer shall have a clear color when dry.

Penetrating concrete stain mix, shall achieve color variations present in the natural stone being simulated for this project. Stain shall create a surface that is breathable (allowing water vapor transmission), and that resists deterioration from water, acid, alkali, fungi, sunlight, or weathering. Stain mix shall be a waterborne, low V.O.C. material, less than 1.5 lbs./gal., and shall meet requirements for weathering resistance of 2000 hours accelerated exposure.

Store paint, stain, sealer material in an area where temperatures will not be less than 50°F or more than 100°F in accordance with OSHA and local Fire Code requirements.

Galvanizing. Precast Concrete Noise Abatement Wall structural steel including steel posts, and attachments that are exposed to weathering shall be hot-dip galvanized in accordance with ASTM A123 (AASHTO M111). Structural steel and post assemblies shall be hot-dip galvanized after fabrication including the attachment of angles, stiffeners, or bent plates. All high-strength bolts and other connectors shall be galvanized according to Standard Specification Section 1006.08.

Paint. All galvanized Precast Concrete Noise Abatement Wall structural steel, posts and attachments shall be painted using an approved two-coat paint system manufactured by

IDOT approved producers. The first coat shall be epoxy polyamide meeting the requirements of Article 1008.05 (d) of the Standard Specifications. The second (final) coat shall be aliphatic urethane meeting the requirements of Article 1008.05 (e) of the Standard Specifications, the color shall match the color of the precast concrete panel stain Sherwin-Williams 7633, Taupe Tone 248-C4 (#ADA090 Hex Color Code).

The paint system shall be applied according to the applicable portions of Section 506 and the paint manufacturer's recommendations.

Anchor Bolts, Nuts, Washers. Anchor Bolts shall be cast in place as shown on the Plans and follow the requirements of Standard Specification Section 1006.09. Washers and Nuts shall match the hardness of the Anchor Bolts.

Elastomeric Material. Fabric Reinforced Elastomeric Sheeting shall be per Section 1028 of the Standard Specification. The Fabric Bearing Pads shall be per Section 1082 of the Standard Specifications and the pad shall be installed after steel post assembly has been galvanized and painted. Adhesion of the pad to the steel shall be per Article 1083.02 of the Standard Specifications.

Shims. Plastic Shims shall be VERS-A-SHIM high impact plastic shims ASTM D792 and D695 or equivalent.
Concrete shims shall be Class PC concrete or approved equivalent.

Caulk. Non-Structural caulk sealant shall be SIKAFLEX 15 LM or equivalent.
Structural caulk shall be SIKADUR 51 NS Flexible Epoxy Control Joint Sealer / Adhesive or equivalent.

Backer Rod shall be MILE HIGH FOAM product sized per manufacturer's standard or equivalent.

Fasteners and Hardware. Miscellaneous fasteners and hardware shall conform to Article 1006.08 of the Standard Specifications and shall be stainless steel or galvanized steel in accordance with ASTM A153 (AASHTO M232) as indicated on the Plans.

Filter Fabric. Filter fabric shall be according to Article 1080.03 of the Standard Specifications.

SUBMITTALS

General. Submittals shall be in conformance with Article 105.04 of the Illinois Tollway Supplemental Specifications except as modified herein.

Precast Concrete

1. Product technical data including:
   a. Manufacturer's mix design and material certifications for aggregate and cement type used for each plan to precast wall panels and posts.
   b. Manufacturer's installation instructions.

2. A 2'x2' sample of the concrete form liner pattern and texture of each type, including special shapes to show range of colors, texture, finishes, and dimensions. Submit a separate set of sample panels approximately 2'x2' from the stain manufacturer to establish application procedures, color and appearance to the Engineer for review and approval.
3. Manufacturer's certification that precast panels that are to be furnished meet or exceed the specifications.
4. Qualifications of testing lab and technician.
5. Test results for all concrete testing.

Test Results. Per Section 106 of the Illinois Tollway Supplemental Specifications, the Contractor shall submit all test results necessary to assure compliance of the materials with this Special Provision and shall furnish copies of such test results to the Engineer. The Contractor shall not make use of nor incorporate into the Work any materials until the tests have been made and the materials are found to be acceptable and in compliance with the requirements of this Special Provision. Tests shall be performed by a nationally accredited testing laboratory, and the test results shall be notarized.

The submittal shall include, but not be limited to, test results for:

Precast Concrete

1. Precast Concrete
   Quality control testing of Precast concrete panels and shims, including certification of all materials incorporated into the panels.
   - compressive strengths
   - slump & air

2. Water Vapor Transmission Test – ASTM D 1653.

3. Additional testing or retesting of concrete materials or other cement-containing products occasioned by their failure, by test or inspection, to meet requirements of the Contract Documents.

Samples. Prior to commencing preparation of Shop Drawings, the Contractor shall submit color samples and details of the proposed surface treatments and finish to the Engineer for their review and approval. The Engineer will select the color and type of surface treatment from the options submitted by the Contractor. The samples shall include a 2' long by 2' wide physical mock-up representative of the panels to be incorporated into the Work. If these samples test panels are not approved, additional test panels shall be furnished until a satisfactory color and finish is obtained, at no additional cost to the Illinois Tollway. The mock-up approved by the Engineer shall then be the standard of comparison for the remaining finishes. The Contractor shall consider in his schedule a 14-calendar day period from the date the submittal is received by the Engineer to the expected date of return with comment. This 14-day review period shall be considered with any resubmittal, and such resubmittals shall not be considered cause for an extension of time to the Contract.

AThe physical sample shall be constructed at the yard using the approved color and surface treatment and approved by the Engineer, which shall be used as the standard of

comparison for the remaining finishes and may not be included in the final construction. At the conclusion of the project the sample is to be removed and disposed of by the Contractor. If production is from multiple yards or if the concrete mixture design is changed during production, additional samples will be required to ensure no variation in stain color.

Mix Design. The Contractor shall submit concrete mix designs in conjunction with the submittal of the Shop Drawings. The mix design submittal shall include product data on all materials used in the mix, material sources and material testing. All mix designs for Portland Cement Concrete shall be in accordance with Section 1020 of the Standard Specifications. The Contractor shall consider in his schedule a 14-calendar day period from the date the submittal is received by the Engineer to the expected date of return with comment. This 14-day period shall be considered with any resubmittal, and such resubmittals shall not be considered cause for an extension of time to the Contract.

CONSTRUCTION REQUIREMENTS

Delivery, Storage, and Handling. The materials for the Precast Concrete Noise Abatement Walls shall be stored by the Contractor at a site(s) approved by the Engineer until the time of installation. The Contractor shall store material above ground on level platforms, covered and protected against wetting, and shall protect the materials from mechanical damage and damage due to excessive temperatures, sunlight, and moisture. If stored outside, all paint, stain and other protective coatings shall have been applied. The Contractor shall inspect all materials and allow the Engineer to inspect all materials as the materials arrive at the project site. Any materials damaged during storage or delivery shall be promptly replaced at no additional cost to the Illinois Tollway.

Each Precast Concrete Panel shall be marked with an identification tag. This identification shall not be visible after installation of the Precast Concrete Panel. The tag shall include the following:

- Casting date
- Contract number
- Noise abatement wall number
- Panel Type: Structure mount, Crashworthy, Non-Crashworthy
- Height of Panel
- Panel mark- the designation corresponding to that shown on the Noise Abatement Wall Panel Schedule in the plans

Each post, anchor bolts, bracket, bents plate, and connection device shall be marked with an identification tag. This identification shall not be visible after installation of the posts. The tag shall include the following:

- Rolling date (if W-Section)
- Fabrication date
- Contract number
- Noise abatement post number
- Post height
- Post size
- Post mark- the designation corresponding to that shown on the Noise Abatement Wall post Schedule in the plans.

Posts for Drilled Shafts. Installation of the posts shall be accomplished in accordance with Section 522.08 (b) (1) of the Standard Specifications, the detail shown in the plans, and the details shown on the approved erection plan. Installation of the post per Section 522.08(b)(2) will not be allowed.

Revise Section 522.08(b)(3) to read as follows.
Noise abatement wall post installation shall satisfy the following construction tolerances.

(a) The center of the soldier pile shall be within 1/2 in. of plan location in any direction at the top of the post and within ½ in. of plan location at the top of shaft elevation.
(b) Delete
(c) The top of noise abatement post shall be within ± 2 in. of plan elevation.
(d) Drilled shaft foundations shall be placed within 2 in. of the station and offset indicated on the plans.

Failure to meet these tolerances may require modifications to the wall up to and including removal and reinstallation of the affected portions of the wall.

Placement of the concrete in drilled shafts shall be in accordance with Section 522.08 of the Standard Specifications.

Obstructions encountered during drilling of the noise abatement foundation shafts shall be in accordance with Article 516.14 of the Standard Specifications.

Structural Steel. Installation of structural steel and anchor bolts shall be in accordance with the details shown on the approved erection plan, this Special Provision, Section 505 of the Standard Specifications, Article 105.04 of the Illinois Supplemental Specifications and as approved by the Engineer. The Contractor's erection plans shall be per the applicable requirements of the Illinois Tollway special provision for "Erection of Girders". Notice must be sent to the Engineer and Tollway QA 30 days in advance of steel fabrication.

The Contractor shall be responsible for repair of any damage to the coating system resulting from pick-up and transportation from the storage site or during installation per Section 506 of the Standard Specification Section.

Precast Concrete Panels. Installation of the Precast Concrete Panels shall be accomplished in accordance with the details shown on the approved erection plan, this Special Provision, Section 504 of the Standard Specifications, and as approved by the Engineer. Shims shall be used to construct the panels at the correct elevation and shall be secured with steel banding.

The Contractor shall be responsible for repair of any damage to the Precast Concrete Panels including the coating system resulting from delivery and installation.

No field cutting of the panels shall be permitted, except as required by the Plans or ordered by the Engineer.

Excavation and Backfill. Excavation, including rock excavation, shall be done in accordance with the Plans and Section 202 of the Standard Specifications.

If unsuitable material is present at or below the foundation level, it shall be removed per Section 202 of the Standard Specifications and replaced with special fill or porous granular backfill (or CA18 grade aggregate) to a depth, length and width determined by the Engineer. Special fill or porous granular backfill shall be placed in accordance with Section 206 of the Standard Specifications. Unsuitable material shall be any soil material containing vegetable or organic material, such as mulch, peat, or debris such as wood, glass, concrete and brick pieces. In addition to the locations shown on the Plans, unsuitable material shall also be any material determined to be unsuitable by the Engineer. Soils classified as Pt, OH, OL, and MH as per the United Soil Classification System shall also be considered unsuitable material. All open trenches and holes resulting from excavation, placement of the wall and posts shall be protected. The length of open trench shall be limited to 100 feet.

When the bottom panels retain earth, filter fabric shall be placed at the bottom panel and extend 3' horizontally from the panel and extend vertically to the top of the fill height. The filter fabric shall be placed and secured in accordance with Articles 282.05 and 282.06 of the Standard Specifications. Embankment shall be placed and compacted over the filter fabric in accordance with Section 207 of the Standard Specifications. Open space between the wall panel and post shall be filled with a 1" preformed joint fill in accordance with the Illinois Tollway Special Provision "Bonded Preformed Joint Seal"

If the trench or drilled shaft is located in soils classified as Types 1, 2, 3, or 4, the disposal of the surplus material shall be according towith the Illinois Tollway Special Provision for "Disposal of Regulated Substances and Uncontaminated Soil".

Underground utilities shall be located and marked to verify adequate clearance from foundations. The Contractor shall consider OSHA clearances for overhead obstructions such as wires, cables and roadway/area lighting, prior to noise abatement wall erection.

If required, the Contractor shall trim any trees in order to install the Precast Concrete Noise Abatement Wall. Trimming shall be limited to only that which is necessary to install the system. All trimmings shall be disposed of outside the Illinois Tollway right-of-way in a manner that will not be in violation of any law, regulation or ordinance. Specific tree trimming procedures shall be identified, and comply with Standard Specifications, Article 201.06. Burning within, or in proximity to Illinois Tollway right-of-way is not permitted.

Warranties

The Contractor shall submit all System Supplier's warranties for materials incorporated into the Work in accordance with Article 105.18 of the Illinois Tollway Supplemental specifications except as modified herein.

The workmanship guaranty shall be for a minimum period of 3 years starting from the date of final completion of the Contract. In the event any defects occur, the Contractor shall complete the repairs within 60 days of written notification of such defects and at no additional cost to the Illinois Tollway.

The materials shall be impervious to road salt and calcium chloride for a 5-year Manufacturer/System Supplier warranty period. In the event the material fails to meet the aforementioned requirement within the 5-year warranty period, the Manufacturer/System Supplier shall complete the repairs within 60 days of written notification of such defects

and at no additional cost to the Illinois Tollway.

Design Modifications. If the soil bearing pressure differs from that shown on the plans by more than 10 percent, the Engineer shall be contacted to determine if any foundation shafts require modification. In addition, if the type of soil or rock encountered is not similar to that shown in the subsurface exploration data, the Contractor may be required to extend the noise abatement foundation length(s) beyond those shown in the plans or increase the diameter. In either case, the Engineer will determine if revisions are necessary and the extent of the modifications required.

All known utilities existing within the limits of construction are either indicated on the plans or visiblye marked in the field. If the noise abatement wall alignment conflicts with a utility, either vertically or horizontally, the Engineer shall be contacted to determine if any noise abatement alignment changes are required. Every effort shall be made to identify changes in the re wall alignment prior to preparation of shop drawings. Changes to the noise abatement wall alignment shall be localized to the point of conflict to minimize wholesale changes to the alignment.

Should changes to the noise abatement wall alignment or post spacing occur and sections of the precast concrete panels or individual structural steel post are not salvageable, the contractor shall order and provide new precast concrete panels and structural steel posts. Prior to ordering material, the contractor shall measure and prepare shop drawings for the new precast concrete panels and structural steel posts and assembly accessories. The new panels and posts shall be paid according to Article 109.04 of the Standard Specifications.

METHOD of MEASUREMENT

This work will be measured for payment in square feeoot for each wall. The length of the noise abatement wall shall be measured along the center of the wall beginning and ending at the centerline of each end post. For ground mounted noise abatement wall, the height of the wall will be measured from the top of the exposed panel to the bottom of the bottom panel, including the portion below ground. For structure mounted noise abatement walls, the height of the wall will be measured from the top of the exposed panel to the bottom panel elevation shown on the plans. The area of post extending below ground or extending below bottom panel when attached to a structure, will not be measured for payment. Areas with vertical steps in the wall will be deducted from areas measured.

BASIS of PAYMENT

This work will be paid for at the contract unit price per square foot forper PRECAST CONCRETE NOISE ABATEMENT WALL, GROUND MOUNTED, NON-CRASHWORTHY, or PRECAST CONCRETE NOISE ABATMENT WALL, GROUND MOUNTED, CRASHWORTHY, or PRECAST CONCRETE NOISE ABATMENT WALL, STRUCTURE MOUNTED at specified location and shall include all components required to furnishdeliver and erect the precast noise abatement wall panels, posts and assembly accessories such as blocking, shims, banding, backer rod, caulk, and filter fabric. Tree trimming required for installation of the wall units will be included as part of this work.

Foundation soils which are shown on the drawings as unsuitable, or which are determined to be unsuitable, and directed by the Engineer to be excavated and replaced with Special Fill or Porous Granular Backfill will be measured and paid for as EARTH EXCAVATION, and either SPECIAL FILL or POROUS GRANULAR BACKFILL prior to initiating installation of the noise abatement wall. Any temporary or permanent liners for drilled shafts will not be measured for payment. Foundation soils which are shown on the drawings as Type 1 soils, or which are later re-classified as Type 1 soils, the disposal of the surplus material will be measured and paid for as NON-SPECIAL WASTE DISPOSAL (TYPE 1).

Obstruction mitigation will be paid for according to Article 109.04

SPECIAL PROVISION
FOR
HANDHOLE (CC)

Effective: 7/1/16
Revised: N/A

The installation of a handhole shall meet the requirements of Section 814 of the Standard Specifications, with the addition as the following:

All handholes shall be concrete poured in place against undisturbed earth. No pre-cast concrete handholes will be accepted.

The handholes shall have an inside dimension of 21-1/2" (549 mm) minimum. Frames and lid openings shall match this dimension.

The cover of the handhole shall be labeled "TRAFFIC SIGNALS" with legible raised letters.

All conduits will enter the handhole at a depth of 30" (760 mm) except for the conduits between the curb and handhole for detector loops when the handhole is less than five (5) feet (1.52 m) from the detector loop. All conduit ends should be sealed with a waterproof sealant to prevent the entrance of contaminants into the handhole.

For grounding purposes the handhole frame shall have provisions for a 7/16" (15.875 mm) diameter stainless bolt cast into the frame. The covers shall have a stainless steel threaded stint extended from the eye hook assembly for the purpose of attaching the grounding conductor to the handhole frame and cover.

The minimum wall thickness for heavy duty hand holes shall be 12 inches (300 mm).

Steel cable hooks shall be coated with hot-dipped galvanization in accordance with AASHTO Specification M111. Hooks shall be a minimum of 1/2 inch (12.7mm) diameter with two 90 degree bends and extend into the handhole at least 6 inches (150 mm). Hooks shall be placed a minimum of 12 inches (300 mm) below the lid or lower if additional space is required.

The French drain shall be constructed of crushed stone or gravel, Gradation CA 5 or CA 7, and according to Section 601 of the Standard Specifications.

Basis of Payment. This work will be paid for at the contract unit price EACH for HANDHOLE, HEAVY-DUTY HANDHOLE, or DOUBLE HANDHOLE, which price shall be payment in full for all necessary excavating, backfilling, disposal of unsuitable materials, and furnishing all materials within the limits of the handhole.

SPECIAL PROVISION
FOR
STORM SEWER (WATER MAIN REQUIREMENTS) (PS)

Description: This work shall consist of constructing storm sewer in areas where the minimum horizontal separation from water main and/or water service lines cannot be maintained. The separation requirements are defined in the Standard Specifications for Water & Sewer Main Construction in Illinois.

General: The work shall be performed according to Section 550 of the "Standard Specifications" and 35 Illinois Administrative Code 653.119, which requires the storm sewer to be pressure tested (for storm sewers where 10' horizontal separation from water main is not met) to the maximum expected surcharge pressure before backfilling.

Material: The material and installation requirements shall be according to the latest edition of the “Standard Specifications for Water and Sewer Main Construction in Illinois”, and the applicable portions of Section 550 of the Standard Specifications, which may include concrete collars and encasing pipe with seals if required.

- Concrete Pressure Pipe: The concrete pressure pipe shall meet the requirements of the latest AWWA Standards C300, C301, and C303. The structural design of pre-stressed concrete cylinder pipe shall be according to the latest addition of AWWA Standard C304.

- Ductile Iron Pipe: The ductile iron pipe shall meet the requirements of ANSI A 21.51 (AWWA Cl51). The class or thickness design shall be according to ANSI A 21.50 (AWWA C150j. The ductile iron pipe shall be seal coated and/or cement lined according to ANSI A 21.4 (AWWA CJ04). The ductile iron pipe shall have mechanical or rubber (slip seal or push on) joints.

- Steel Pipe: The steel water pipe shall meet the requirements of the latest AWWA Standard C200. The structural design shall be according to the latest edition of C200 and AWWA Manual M-11 shall serve as the standard of practice for design and installation.

Method of Measurement: This work will be measured for payment in place in feet. The measurement shall be according to Article 550.09 of the "Standard Specifications".

Basis of Payment: This work will be paid for at the contract unit price per foot for STORM SEWERS (WATER MAIN REQUIREMENTS) of the diameter specified. The unit price shall include all equipment, materials and labor necessary to complete the work as specified The cost of pressure testing the storm sewer included in the unit price for STORM SEWERS (WATER MAIN REQUIREMENTS).

SPECIAL PROVISION
FOR
CONCRETE FOUNDATION, PEDESTRIAN POST (D1)

Effective: April 1, 2019
878.03TS

This item shall follow Section 878. Traffic Signal Concrete Foundation of the Standard Specifications.

No foundation is to be poured until the Resident Engineer gives his/her approval as to the depth of the foundation.

Basis of Payment.
This work will be paid for at the contract unit price per foot of depth of CONCRETE FOUNDATION, TYPE A 10-INCH DIAMETER.

Pay Item Number	Designation	Unit of Measure
X8780010	CONCRETE FOUNDATION, TYPE A 10-INCH DIAMETER	FOOT

SPECIAL PROVISION
FOR
PEDESTRIAN PUSH-BUTTON (CC)

Effective: 1/1/18
Revised: N/A

The installation of a Pedestrian Pushbutton shall meet Section 888 and 1074.02 of the Specifications except as revised with this Special Provision.

This item shall consist of furnishing and installing a latching (single call) or non-latching (dual call) push-button assembly which shall be ADA compliant, highly vandal resistant, be pressure activated with minimal movement and can not be stuck in a closed or constant call position. A mounting bracket and/or extension shall be used to assure proper orientation when two pedestrian push buttons are required for one post. The price of the bracket and/or extension shall be included in the cost of the pedestrian push button. The contractor is not allowed to install a push-button assembly with the sign below the push-button in order to meet mounting requirements.

The pedestrian push-button housing shall be constructed of aluminum alloy according to ASTM B 308 6061-T6 and powder coated yellow, unless otherwise noted on the plans. The housing shall be furnished with suitable mounting hardware.

Stations shall be designed to be mounted directly to a post, mast arm pole or wood pole. The station shall be aluminum and shall accept a 3 inch (75mm) round push-button assembly and a regulatory pedestrian instruction sign according to MUTCD, sign series R10-3e 9 x 15 inch sign with arrow(s) for a count-down pedestrian signal. The pedestrian station size without count-down pedestrian signals shall accommodate a MUTCD sign series R10-3b or R10-3d 9 x 12 inch sign with arrow(s).

Stations shall be designed to be mounted to a post, mast arm pole or wood pole. The station shall be aluminum and shall accept a 3 inch (75mm) round push-button assembly and a regulatory pedestrian instruction sign according to MUTCD, sign series R10-3e 9” x 15” sign with arrow(s) for a count-down pedestrian signal. The pedestrian station size without count-down pedestrian signals shall accommodate a MUTCD sign series R10-3b or R10-3d 9” x 12” sign with arrow(s). Pedestrian signs shall be retroreflective.

Pedestrian push buttons and stations shall be mounted to mast arm poles, posts or wood poles as shown on the plans and shall be fully ADA accessible from a paved or concrete surface. See the District’s Detail sheets for orientation and mounting details.

Pedestrian pushbutton extension may be needed for the accessibility and correct alignment of pedestrian pushbutton. The extension shall be included in cost of the pay item “Pedestrian Push-Button”.

Basis of Payment. This work shall be paid for at the contract unit price EACH for PEDESTRIAN PUSH-BUTTON, which price shall be payment in full for furnishing and installing the pushbutton assembly complete.

Pay Item Number	Designation	Unit of Measure
88800100	PEDESTRIAN PUSH-BUTTON	EACH

SPECIAL PROVISION
FOR
PEDESTRIAN SIGNAL POST (D1)

Effective: January 1, 2020
Revised:
875.02TS

Description.
This work shall consist of furnishing and installing a metal pedestrian signal post. All installations shall meet the requirements of the "District One Standard Traffic Signal Design Details".

Materials.

a. General. The pedestrian signal post shall be designed to support the traffic signal loading shown on the plans. The design and fabrication shall be according to the Standard Specifications for Structural Supports for Highway Signs, Luminaires, and Traffic Signals, as published by AASHTO.

b. Post. The post shall be made of steel or aluminum and have an outside diameter of 4 1/2 in. The post shall be threaded for assembly to the base. Aluminum posts shall be according to the specifications for Schedule 80 aluminum pipe. Steel posts shall be according to the specifications for Schedule 40 steel pipe.

c. Base. The base of a steel post shall be cast iron. The base of an aluminum post shall be aluminum. The base shall be threaded for the attachment to the threaded post. The base shall be approximately 10 in. high and 6 3/4 in. square at the bottom. The bottom of the base shall be designed to accept four 5/8 in. diameter anchor rods evenly spaced in a 6 in. diameter circle. The base shall be true to pattern, with sharp clean cutting ornamentation, and equipped with access doors for cable handling. The door shall be fastened to the base with stainless steel screws. A grounding lug shall be provided inside the base.

d. Anchor Rods. The anchor rods shall be 5/8 in. in diameter and 16 in. long and shall be according to Article 1006.09. The anchor rods shall be threaded approximately 6 in. at one end and have a bend at the other end. The first 12 in. at the threaded end shall be galvanized. One each galvanized nut and trapezoidal washer shall be furnished with each anchor rod. The washer shall be properly sized to fully engage and sit flush on all sides of the slot of the base plate.

   The aluminum post and base shall be drilled at the third points around the diameter and 1/4 in. by 2 in. stainless steel bolts shall be inserted to prevent the post from turning and wobbling.

e. Finish. The steel post, steel post cap and the cast iron base shall be hot-dipped galvanized according to AASHTO M 111. If the Department approves painting, powder coating by the manufacturer will be required over the galvanization in accordance with 851.01TS TRAFFIC SIGNAL PAINTING Special Provisions. If the post and the base are threaded after the galvanization, the bare exposed metal shall

be immediately cleaned to remove all cutting solvents and oils, and then spray painted with two coats of an approved galvanized paint.

The aluminum post shall have a natural finish, 100 grit or finer.

Installation.
The pedestrian signal post shall be erected plumb, securely bolted to a concrete foundation, and grounded to a ground rod according to the details shown on the plans. No more than 3/4 in. of the post threads shall protrude above the base.

A post cap shall be furnished and installed on the top of the post. The post cap shall match the material of the post. The Contractor shall apply an anti-seize paste compound on all nuts and bolts prior to assembly.

Prior to the assembly, the Contractor shall apply two additional coats of galvanized paint on the threads of the post and the base. The Contractor shall use a fabric post tightener to screw the post to the base.

Basis of Payment.
This work will be paid for at the contract unit price per each for PEDESTRIAN SIGNAL POST, of the length specified

Pay Item Number	Designation	Unit of Measure
X1400367	PEDESTRIAN SIGNAL POST, 10 FT.	EACH

* THIS EXCAVATION IS NOT PAID FOR SEPARATELY BUT INCLUDED IN THE COST OF THE ASSOCIATED WORK ITEM.

NOTES:

(1) "SOILS NOT APPROVED" SHALL NOT BE REUSED ON THE ILLINOIS TOLLWAY ROW AND SHALL BE DISPOSED OF AS EARTH EXCAVATION OR NON-SPECIAL WASTE DISPOSAL, TYPE 1 DEPENDING ON THE SOILS CLASSIFICATION.

(2) "SOILS APPROVED WITH RESTRICTION" CAN BE REUSED IN THE FOLLOWING MUNICIPALITIES WHICH HAVE IEPA APPROVED GROUNDWATER ORDINANCES: THE CITY OF HICKORY HILLS AND VILLAGE OF BRIDGEVIEW. THE VILLAGE OF JUSTICE DOES NOT HAVE AN IEPA APPROVED ORDINANCE IN PLACE.

(3) SOILS APPROVED WITH RESTRICTION THAT CANNOT BE REUSED WITHIN THE PROJECT AND SOILS NOT APPROVED MUST BE REMOVED AS EITHER NON-SPECIAL WASTE DISPOSAL, TYPE 1, THROUGH AN EXCAVATION PAY ITEM, OR INCLUDED IN THE COST OF THE ASSOCIATED WORK ITEM.

(4) INCIDENTIAL EXCAVATION IS OUTLINED IN A SEPARATE TABLE WHICH IDENTIFIES ENVIRONMENTAL SOIL CLASSIFICATION AND IS NOT CONSIDERED IN CALCULATION FOR SUITABLE EXCAVATION. THIS IS FOR INFORMATION ONLY EXCEPT FOR QUANTITIES OF TYPE 1 SOIL FOR DISPOSAL. PERFORMANCE BASED RETAINING WALLS EXCAVATION IS INCLUDED AS INCIDENTAL TO THE RETAINING WALL AND ASSUMED AS MSE UNLESS OTHERWISE STATED BY THE DESIGNER. QUANTITIES MAY BE ADJUSTED BASED ON WALL DESIGN.

(5) WHEN THERE IS EXCESS SOIL APPROVED FOR REUSE OR APPROVED FOR REUSE WITH RESTRICTION, THE CONTRACTOR SHALL FIRST REUSE ENVIRONMENTAL SOILS TYPE 1 TO MINIMIZE THE VOLUME OF MATERIAL DISPOSED AT A NON-SPECIAL WASTE DISPOSAL FACILITY.

(6) SUITABLE EXCAVATION, N, REPRESENTS SUITABLE EXCAVATED MATERIAL VOLUMES ADJUSTED FOR SHRINKAGE USING A SHRINKAGE MULTIPLIER OF 92% AND ONLY INCLUDES EARTHWORK VOLUMES ASSOCIATED WITH EARTH EXCAVATION, A; ROCK EXCAVATION, B; AND STRUCTURE EXCAVATION, D.

(7) SHRINKAGE FACTOR OF 8% WAS USED TO CALCULATE ADJUSTED EXCAVATION, SS IS THE SHRINKAGE MULTIPLIER SS = (100%-8%) = 92%.

(8) TOPSOIL SHRINKAGE FACTOR OF 0% WAS USED TO CALCULATED ADJUSTED TOPSOIL EXCAVATION, TSS IS THE TOPSOIL SHRINKAGE MULTIPLIER = (100%-0%) = 100%.

(9) IF MATERIAL SHOWN ON THE EARTHWORK SCHEDULE OF INCIDENTAL QUANTITIES IS TO BE USED FOR EMBANKMENT, THE VOLUME OF MATERIAL USED SHALL BE PAID AS FURNISHED EXCAVATION (20400800). SEE SOILS MANAGEMENT PLAN FOR LOCATION OF TYPE 1 SOIL APPROVED FOR REUSE OR APPROVED FOR REUSE WITH RESTRICTION.

(10) THE COST TO PLACE AND COMPACT SUITABLE MATERIAL GENERATED FROM STRUCTURE EXCAVATION IN ACCORDANCE WITH THE EMBANKMENT (ILLINOIS TOLLWAY) SPECIAL PROVISION SHALL BE INCLUDED IN THE COST OF STRUCTURE EXCAVATION.

(11) SEE VOLUME 7 FOR ADDITIONAL EARTHWORK QUANTITIES AND PAY ITEMS RELATED TO COOK COUNTY IMPROVEMENTS.

(12) TOPSOIL PLACEMENT QUANTITIES EXCLUDE AREAS AT THE BOTTOM OF DETENTION BASINS WHERE TOPSOIL PLACEMENT IS PAID FOR AS PREPARED TOPSOIL FURNISH AND PLACE, 8" (JT211200). FOR TOPSOIL PLACEMENT DETAILS AT DETENTION BASINS, SEE DRAINAGE PLANS.

(13) SOIL EXCAVATED FROM TOLLWAY ROW SHALL ONLY BE REUSED WITHIN TOLLWAY ROW.

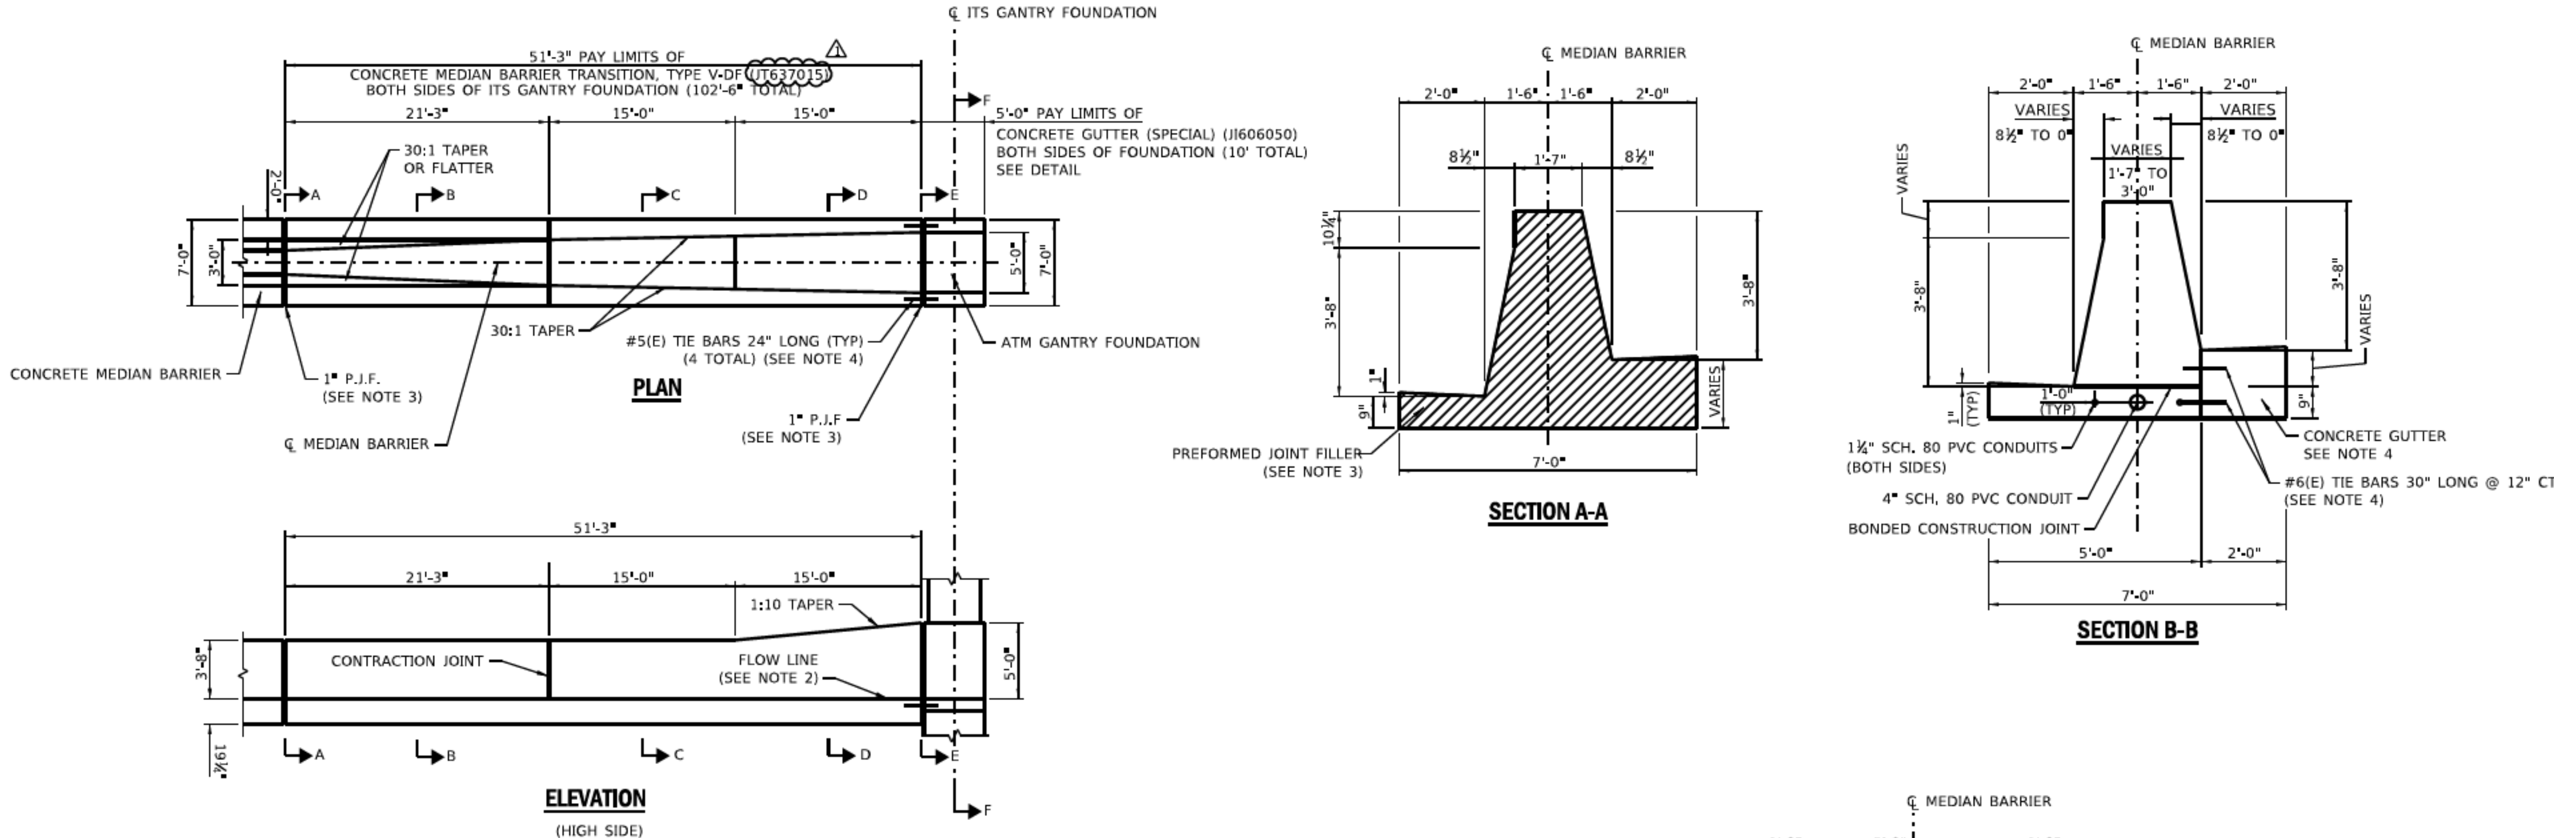
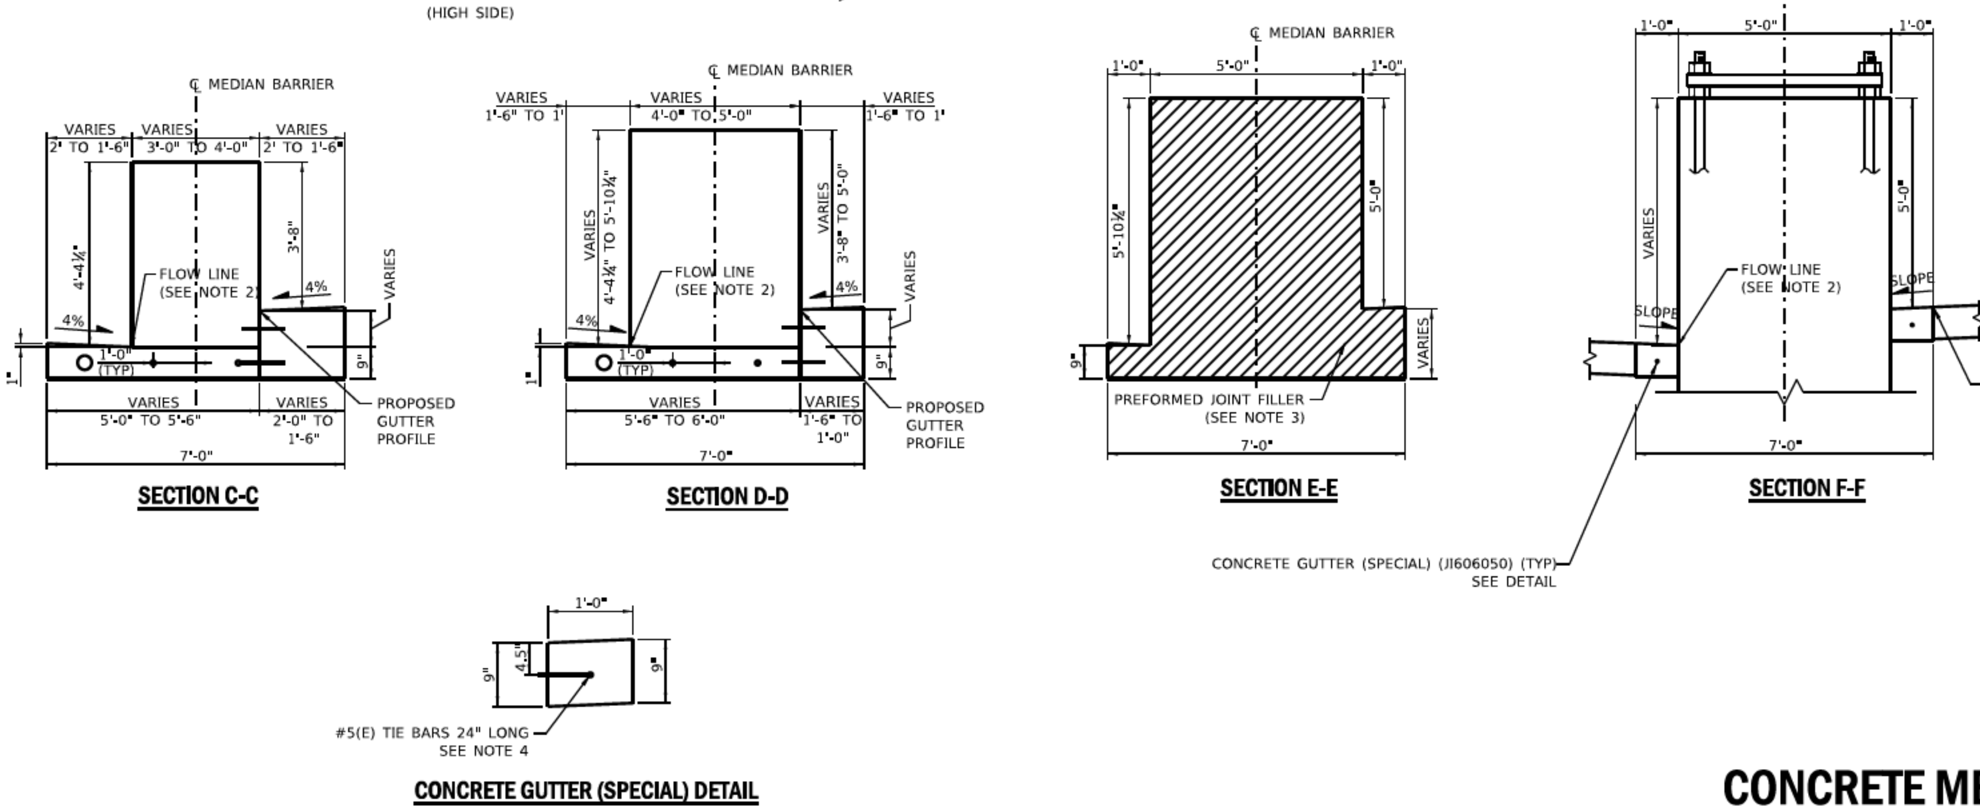
PLOT DATE = 7/2/2020





NOTES:

1. 2" DEEP CONTRACTION JOINTS SHALL BE DONE BY SAWING AND SHALL BE CONSTRUCTED IN THE CONCRETE BARRIER WALL, CONCRETE BARRIER BASE, AND CONCRETE GUTTER. MAXIMUM CONTRACTION JOINT SPACING SHALL BE 30'-0". THE MINIMUM DISTANCE BETWEEN CONTRACTION JOINTS SHALL BE 2'-0".
2. GUTTER PROFILE IN THE VICINITY OF SAG VERTICAL CURVES, ALONG FLAT GRADES AND AT THE MEETING OF PROPOSED AND EXISTING GUTTER, SHALL BE CAREFULLY CONTROLLED AND FIELD ADJUSTED IF NECESSARY TO ENSURE POSITIVE DRAINAGE AND AVOID PONDING.
3. PROVIDE NON-STAINING GRAY ONE COMPONENT NON-SAG ELASTOMERIC GUN GRADE POLYURETHANE SEALANT MEETING THE REQUIREMENTS OF ASTM C-920, TYPE S, GRADE NS, CLASS 25, USE T WITH A BACKER ROD.
4. THE BARRIER, BARRIER BASE, AND CONCRETE GUTTER, INCLUDING #5(E) AND #6(E) TIE BARS, WITHIN THE PAY LIMITS SHOWN ON THE PLAN VIEW SHALL BE INCLUDED IN THE COST OF "CONCRETE MEDIAN BARRIER TRANSITION, TYPE V-DF" (JT637015).

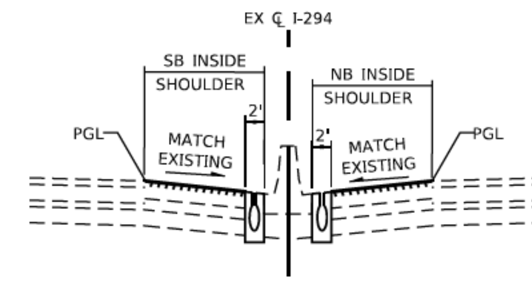
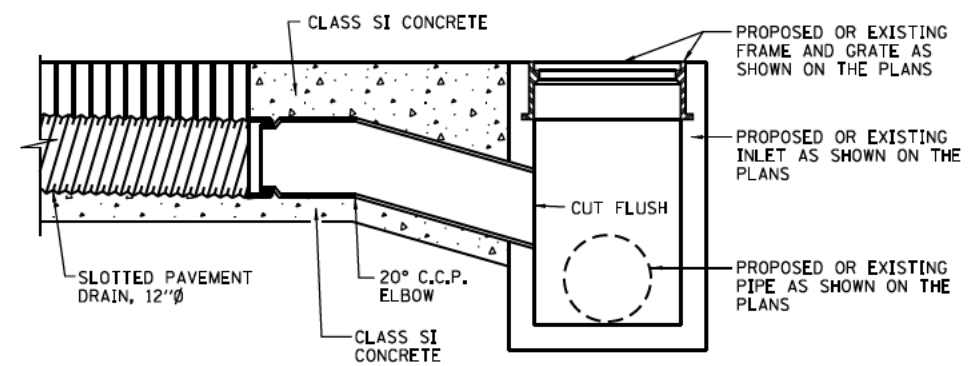
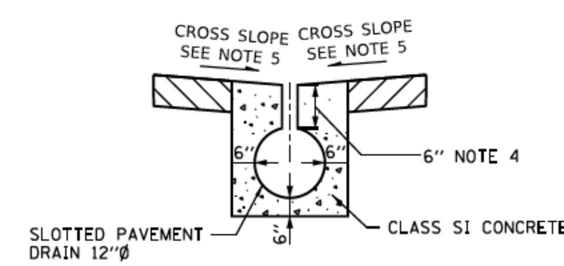
SLOTTED DRAIN CROSS OVER TYPICAL SECTION



SLOTTED DRAIN INSIDE SHOULDERS TYPICAL SECTION



CONNECTION TO EXISTING DRAINAGE STRUCTURE



NOTES FOR SLOTTED PAVEMENT DRAIN:

1. SLOTTED PAVEMENT DRAINS SHALL BE 12" DIA. 16 GAUGE, FULL BITUMINOUS COATED WITH PAVED INVERT UNLESS OTHERWISE SPECIFIED.
2. SLOTTED PAVEMENT DRAINS SHALL BE INSTALLED IN A CONTOURED TRENCH AND BACKFILLED WITH CLASS SI CONCRETE.
3. THE UPSTREAM END OF EACH SLOTTED PAVEMENT DRAIN, 12" DIA., INSTALLATION SHALL BE SEALED WITH A WELDED END PLATE IN ACCORDANCE WITH MANUFACTURERS SPECIFICATIONS, UNLESS OTHERWISE CONNECTED TO A DRAINAGE STRUCTURE.
4. DEPTH OF SLOT CAN BE VARIED FROM 6" MINIMUM TO 12" MAXIMUM TO INCREASE SLOPE OF PIPE AS DETAILED FOR EACH SITE.
5. CROSS SLOPE SHALL MATCH SHOULDER SLOPE IN CROSSOVER LOCATIONS WITH MAXIMUM OF 4% TO FORM SWALE. IN LOCATIONS ALONG BARRIER WALL USE CONTINUOUS CROSS SLOPE (MATCH EXISTING SHOULDER SLOPE) TO DRAIN TO BARRIER WALL GUTTER.

PROPOSED ROW

NOTES:

1. FOR WALL BILL OF MATERIAL, REFER TO SHEET NWA-4.
2. ALL MEASUREMENTS AND STATIONS ARE TAKEN ALONG THE FRONT FACE OF NAW UNLESS NOTED OTHERWISE.
3. TOP OF WALL AND TOP OF POST ELEVATIONS ARE TO MATCH, AS SHOWN IN THE ELEVATION VIEW.
4. PROPOSED GRADES AT FRONT AND BACK FACE OF THE NAW, AT ANY POINT ALONG THE WALL, ARE EQUAL.

NOISE ABATEMENT WALL TS17.60N, NB(R)
GENERAL PLAN & ELEVATION 1

SHEET NO. NWA - 1 OF 6
DRAWING NO. 1086 OF 1762

PLOT DATE = 7/16/2020 PLOT TIME = 5:47:07 PM PLOT SCALE = 32.0000 ' / in.

GENERAL

1. ALL DIMENSIONS ARE IN FEET UNLESS NOTED OTHERWISE.
2. ALL PLAN DIMENSIONS ARE HORIZONTAL EXCEPT AS NOTED OTHERWISE.
3. PLAN DIMENSIONS AND DETAILS RELATIVE TO EXISTING STRUCTURE HAVE BEEN TAKEN FROM EXISTING PLANS AND ARE SUBJECT TO NOMINAL CONSTRUCTION VARIATIONS. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY SUCH DIMENSIONS AND DETAILS IN THE FIELD AND MAKE NECESSARY APPROVED ADJUSTMENTS PRIOR TO CONSTRUCTION OR ORDERING OF MATERIALS. SUCH VARIATIONS SHALL NOT BE CAUSE FOR ADDITIONAL COMPENSATION FOR A CHANGE IN THE SCOPE OF WORK; HOWEVER, THE CONTRACTOR SHALL BE PAID FOR THE QUANTITY ACTUALLY FURNISHED AT THE UNIT PRICE FOR THE WORK.
4. FOR EXISTING UTILITIES AND CONFLICT, SEE "EXISTING UTILITY PLAN" SHEETS.

CONSTRUCTION

1. CONTRACTOR SHALL NOT SCALE DIMENSIONS FROM THE CONTRACT PLANS FOR CONSTRUCTION PURPOSES. SCALES SHOWN ARE FOR INFORMATION ONLY.
2. NO CONSTRUCTION JOINTS EXCEPT THOSE SHOWN ON THE PLANS WILL BE ALLOWED UNLESS APPROVED BY THE ENGINEER.
3. THE CONTRACTOR MAY REQUEST COPIES OF EXISTING CONSTRUCTION PLANS THAT ARE CURRENTLY ON FILE WITH THE TOLLWAY. THE REQUEST SHALL BE IN WRITING WITH THE UNDERSTANDING THAT ANY REPRODUCTION COST WILL BE AT THE CONTRACTOR'S EXPENSE AT NO ADDITIONAL COST TO THE ILLINOIS TOLLWAY.
4. NO CONCRETE CUTTING SHALL BE PERMITTED UNTIL THE CUTTING LIMITS HAVE BEEN OUTLINED BY THE CONTRACTOR AND APPROVED BY THE ENGINEER.
5. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL UTILITIES PRIOR TO STARTING CONSTRUCTION. CALL J.U.L.I.E., 800-892-0123.
6. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL FIBER OPTIC UTILITIES PRIOR TO STARTING CONSTRUCTION. THE CONTRACTOR SHALL INITIATE THE LOCATION PROCESS FOR THE FIBER OPTIC CABLE BY COMPLETING A "REQUEST TOLLWAY UTILITIES LOCATE" FORM FILLED IN ONLINE AT THE TOLLWAY WEBSITE UNDER "DOING BUSINESS" AT LEAST FOUR (4) BUSINESS DAYS PRIOR TO STARTING ANY UNDERGROUND OPERATIONS, EXCAVATIONS OR DIGGING OF ANY TYPE IN THE GENERAL AREA OF THE FIBER OPTIC CABLE.
7. THE SOIL BORING LOGS REPRESENT POINT INFORMATION. PRESENTATION OF THIS INFORMATION IN NO WAY IMPLIES THAT SUBSURFACE CONDITIONS ARE THE SAME AT LOCATIONS OTHER THAN THE EXACT LOCATION OF THE BORING.
8. WHENEVER ANY MATERIAL IS DEPOSITED INTO A DRAINAGE SYSTEM OR DRAINAGE STRUCTURES, THE DEPOSITED MATERIAL SHALL BE REMOVED AT THE CLOSE OF EACH WORKING DAY. AT THE CONCLUSION OF CONSTRUCTION OPERATIONS, ALL DRAINAGE SYSTEMS AND STRUCTURES SHALL BE FREE FROM DIRT AND DEBRIS DEPOSITED DURING THE VARIOUS CONSTRUCTION OPERATIONS.
9. THE CONTRACTOR SHALL USE CARE WHEN EXCAVATING AROUND EXISTING FOUNDATIONS. ANY DAMAGE TO THE EXISTING STRUCTURE AND/OR SUPPORTING FOUNDATION SHALL BE REPAIRED OR REPLACED AT THE CONTRACTOR'S EXPENSE.

* CONTRACTOR MAY INCREASE THE STANDARD CENTER PANEL HEIGHTS, MAXIMUM 9FT, TO MINIMIZE THE NUMBER OF JOINTS. THE ADJACENT TOP PANEL MAY ALSO BE ADJUSTED, PROVIDED STANDARD PANEL HEIGHTS AS SHOWN IN STANDARD G16 ARE USED. CONTRACTOR SHALL SUBMIT SHOP DRAWINGS TO THE ENGINEER FOR REVIEW PRIOR TO INSTALLATION.

1

GENERAL NOTES

1. CONTRACTOR SHALL NOT SCALE DIMENSIONS FROM THE CONTRACT PLANS FOR CONSTRUCTION PURPOSES. SCALES SHOWN ARE FOR INFORMATION ONLY.
2. NO CONSTRUCTION JOINTS EXCEPT THOSE SHOWN ON THE PLANS SHALL BE ALLOWED UNLESS APPROVED BY THE ENGINEER.
3. THE CONTRACTOR MAY REQUEST COPIES OF EXISTING CONSTRUCTION PLANS THAT ARE CURRENTLY ON FILE WITH THE ILLINOIS TOLLWAY. THE REQUEST SHALL BE IN WRITING WITH THE UNDERSTANDING THAT ANY REPRODUCTION COST WILL BE AT THE CONTRACTOR'S EXPENSE AT NO ADDITIONAL COST TO THE ILLINOIS TOLLWAY.
4. NO CONCRETE CUTTING SHALL BE PERMITTED UNTIL THE CUTTING LIMITS HAVE BEEN OUTLINED BY THE CONTRACTOR AND APPROVED BY THE ENGINEER.
5. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL UTILITIES PRIOR TO STARTING CONSTRUCTION. CONTACT J.U.L.I.E., 800-892-0123.
6. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL FIBER OPTIC UTILITIES PRIOR TO STARTING CONSTRUCTION. THE CONTRACTOR SHALL INITIATE THE LOCATION PROCESS FOR THE FIBER OPTIC CABLE BY COMPLETING A "REQUEST ILLINOIS TOLLWAY UTILITIES LOCATE" FORM ONLINE AT THE ILLINOIS TOLLWAY WEBSITE UNDER "DOING BUSINESS" AT LEAST FOUR (4) BUSINESS DAYS PRIOR TO STARTING ANY UNDERGROUND OPERATIONS, EXCAVATIONS OR DIGGING OF ANY TYPE IN THE GENERAL AREA OF THE FIBER OPTIC CABLE."
7. THE SOIL BORING LOGS REPRESENT POINT INFORMATION. PRESENTATION OF THIS INFORMATION IN NO WAY IMPLIES THAT SUBSURFACE CONDITIONS ARE THE SAME AT LOCATIONS OTHER THAN THE EXACT LOCATION OF THE BORING.
8. WHENEVER ANY MATERIAL IS DEPOSITED INTO A DRAINAGE SYSTEM OR DRAINAGE STRUCTURES, THE DEPOSITED MATERIAL SHALL BE REMOVED AT THE CLOSE OF EACH WORKING DAY. AT THE CONCLUSION OF CONSTRUCTION OPERATIONS, ALL DRAINAGE SYSTEMS AND STRUCTURES SHALL BE FREE FROM DIRT AND DEBRIS DEPOSITED DURING THE VARIOUS CONSTRUCTION OPERATIONS.

* CONTRACTOR MAY INCREASE THE STANDARD CENTER PANEL HEIGHTS, MAXIMUM 9FT, TO MINIMIZE THE NUMBER OF JOINTS. THE ADJACENT TOP PANEL MAY ALSO BE ADJUSTED, PROVIDED STANDARD PANEL HEIGHTS AS SHOWN IN STANDARD G16 ARE USED. CONTRACTOR SHALL SUBMIT SHOP DRAWINGS TO THE ENGINEER FOR REVIEW PRIOR TO INSTALLATION.

1

NOTE:

1. WORK THIS SHEET WITH ILLINOIS TOLLWAY STANDARDS G16.

GENERAL NOTES

1. CONTRACTOR SHALL NOT SCALE DIMENSIONS FROM THE CONTRACT PLANS FOR CONSTRUCTION PURPOSES. SCALES SHOWN ARE FOR INFORMATION ONLY.
2. NO CONSTRUCTION JOINTS EXCEPT THOSE SHOWN ON THE PLANS SHALL BE ALLOWED UNLESS APPROVED BY THE ENGINEER.
3. THE CONTRACTOR MAY REQUEST COPIES OF EXISTING CONSTRUCTION PLANS THAT ARE CURRENTLY ON FILE WITH THE ILLINOIS TOLLWAY. THE REQUEST SHALL BE IN WRITING WITH THE UNDERSTANDING THAT ANY REPRODUCTION COST WILL BE AT THE CONTRACTOR'S EXPENSE AT NO ADDITIONAL COST TO THE ILLINOIS TOLLWAY.
4. NO CONCRETE CUTTING SHALL BE PERMITTED UNTIL THE CUTTING LIMITS HAVE BEEN OUTLINED BY THE CONTRACTOR AND APPROVED BY THE ENGINEER.
5. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL UTILITIES PRIOR TO STARTING CONSTRUCTION. CONTACT J.U.L.I.E., 800-892-0123.
6. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL FIBER OPTIC UTILITIES PRIOR TO STARTING CONSTRUCTION. THE CONTRACTOR SHALL INITIATE THE LOCATION PROCESS FOR THE FIBER OPTIC CABLE BY COMPLETING A "REQUEST ILLINOIS TOLLWAY UTILITIES LOCATE" FORM ONLINE AT THE ILLINOIS TOLLWAY WEBSITE UNDER "DOING BUSINESS" AT LEAST FOUR (4) BUSINESS DAYS PRIOR TO STARTING ANY UNDERGROUND OPERATIONS, EXCAVATIONS OR DIGGING OF ANY TYPE IN THE GENERAL AREA OF THE FIBER OPTIC CABLE."
7. THE SOIL BORING LOGS REPRESENT POINT INFORMATION. PRESENTATION OF THIS INFORMATION IN NO WAY IMPLIES THAT SUBSURFACE CONDITIONS ARE THE SAME AT LOCATIONS OTHER THAN THE EXACT LOCATION OF THE BORING.
8. WHENEVER ANY MATERIAL IS DEPOSITED INTO A DRAINAGE SYSTEM OR DRAINAGE STRUCTURES, THE DEPOSITED MATERIAL SHALL BE REMOVED AT THE CLOSE OF EACH WORKING DAY. AT THE CONCLUSION OF CONSTRUCTION OPERATIONS, ALL DRAINAGE SYSTEMS AND STRUCTURES SHALL BE FREE FROM DIRT AND DEBRIS DEPOSITED DURING THE VARIOUS CONSTRUCTION OPERATIONS.

SP3 CGT09-4	9'-0"	14'-10⅜"	9"	1

* CONTRACTOR MAY INCREASE THE STANDARD CENTER PANEL HEIGHTS, MAXIMUM 9FT, TO MINIMIZE THE NUMBER OF JOINTS. THE ADJACENT TOP PANEL MAY ALSO BE ADJUSTED, PROVIDED STANDARD PANEL HEIGHTS AS SHOWN IN STANDARD G16 ARE USED. CONTRACTOR SHALL SUBMIT SHOP DRAWINGS TO THE ENGINEER FOR REVIEW PRIOR TO INSTALLATION.

1

GENERAL NOTES

1. CONTRACTOR SHALL NOT SCALE DIMENSIONS FROM THE CONTRACT PLANS FOR CONSTRUCTION PURPOSES. SCALES SHOWN ARE FOR INFORMATION ONLY.
2. NO CONSTRUCTION JOINTS EXCEPT THOSE SHOWN ON THE PLANS SHALL BE ALLOWED UNLESS APPROVED BY THE ENGINEER.
3. THE CONTRACTOR MAY REQUEST COPIES OF EXISTING CONSTRUCTION PLANS THAT ARE CURRENTLY ON FILE WITH THE ILLINOIS TOLLWAY. THE REQUEST SHALL BE IN WRITING WITH THE UNDERSTANDING THAT ANY REPRODUCTION COST WILL BE AT THE CONTRACTOR'S EXPENSE AT NO ADDITIONAL COST TO THE ILLINOIS TOLLWAY.
4. NO CONCRETE CUTTING SHALL BE PERMITTED UNTIL THE CUTTING LIMITS HAVE BEEN OUTLINED BY THE CONTRACTOR AND APPROVED BY THE ENGINEER.
5. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL UTILITIES PRIOR TO STARTING CONSTRUCTION. CONTACT J.U.L.I.E., 800-892-0123.
6. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL FIBER OPTIC UTILITIES PRIOR TO STARTING CONSTRUCTION. THE CONTRACTOR SHALL INITIATE THE LOCATION PROCESS FOR THE FIBER OPTIC CABLE BY COMPLETING A "REQUEST ILLINOIS TOLLWAY UTILITIES LOCATE" FORM ONLINE AT THE ILLINOIS TOLLWAY WEBSITE UNDER "DOING BUSINESS" AT LEAST FOUR (4) BUSINESS DAYS PRIOR TO STARTING ANY UNDERGROUND OPERATIONS, EXCAVATIONS OR DIGGING OF ANY TYPE IN THE GENERAL AREA OF THE FIBER OPTIC CABLE."
7. THE SOIL BORING LOGS REPRESENT POINT INFORMATION. PRESENTATION OF THIS INFORMATION IN NO WAY IMPLIES THAT SUBSURFACE CONDITIONS ARE THE SAME AT LOCATIONS OTHER THAN THE EXACT LOCATION OF THE BORING.
8. WHENEVER ANY MATERIAL IS DEPOSITED INTO A DRAINAGE SYSTEM OR DRAINAGE STRUCTURES, THE DEPOSITED MATERIAL SHALL BE REMOVED AT THE CLOSE OF EACH WORKING DAY. AT THE CONCLUSION OF CONSTRUCTION OPERATIONS, ALL DRAINAGE SYSTEMS AND STRUCTURES SHALL BE FREE FROM DIRT AND DEBRIS DEPOSITED DURING THE VARIOUS CONSTRUCTION OPERATIONS.

* CONTRACTOR MAY INCREASE THE STANDARD CENTER PANEL HEIGHTS, MAXIMUM 9FT, TO MINIMIZE THE NUMBER OF JOINTS. THE ADJACENT TOP PANEL MAY ALSO BE ADJUSTED, PROVIDED STANDARD PANEL HEIGHTS AS SHOWN IN STANDARD G16 ARE USED. CONTRACTOR SHALL SUBMIT SHOP DRAWINGS TO THE ENGINEER FOR REVIEW PRIOR TO INSTALLATION.

1

NOTE:

1. WORK THIS SHEET WITH ILLINOIS TOLLWAY STANDARDS G16.

GENERAL NOTES

1. CONTRACTOR SHALL NOT SCALE DIMENSIONS FROM THE CONTRACT PLANS FOR CONSTRUCTION PURPOSES. SCALES SHOWN ARE FOR INFORMATION ONLY.
2. NO CONSTRUCTION JOINTS EXCEPT THOSE SHOWN ON THE PLANS SHALL BE ALLOWED UNLESS APPROVED BY THE ENGINEER.
3. THE CONTRACTOR MAY REQUEST COPIES OF EXISTING CONSTRUCTION PLANS THAT ARE CURRENTLY ON FILE WITH THE ILLINOIS TOLLWAY. THE REQUEST SHALL BE IN WRITING WITH THE UNDERSTANDING THAT ANY REPRODUCTION COST WILL BE AT THE CONTRACTOR'S EXPENSE AT NO ADDITIONAL COST TO THE ILLINOIS TOLLWAY.
4. NO CONCRETE CUTTING SHALL BE PERMITTED UNTIL THE CUTTING LIMITS HAVE BEEN OUTLINED BY THE CONTRACTOR AND APPROVED BY THE ENGINEER.
5. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL UTILITIES PRIOR TO STARTING CONSTRUCTION. CONTACT J.U.L.I.E., 800-892-0123.
6. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL FIBER OPTIC UTILITIES PRIOR TO STARTING CONSTRUCTION. THE CONTRACTOR SHALL INITIATE THE LOCATION PROCESS FOR THE FIBER OPTIC CABLE BY COMPLETING A "REQUEST ILLINOIS TOLLWAY UTILITIES LOCATE" FORM ONLINE AT THE ILLINOIS TOLLWAY WEBSITE UNDER "DOING BUSINESS" AT LEAST FOUR (4) BUSINESS DAYS PRIOR TO STARTING ANY UNDERGROUND OPERATIONS, EXCAVATIONS OR DIGGING OF ANY TYPE IN THE GENERAL AREA OF THE FIBER OPTIC CABLE."
7. THE SOIL BORING LOGS REPRESENT POINT INFORMATION. PRESENTATION OF THIS INFORMATION IN NO WAY IMPLIES THAT SUBSURFACE CONDITIONS ARE THE SAME AT LOCATIONS OTHER THAN THE EXACT LOCATION OF THE BORING.
8. WHENEVER ANY MATERIAL IS DEPOSITED INTO A DRAINAGE SYSTEM OR DRAINAGE STRUCTURES, THE DEPOSITED MATERIAL SHALL BE REMOVED AT THE CLOSE OF EACH WORKING DAY. AT THE CONCLUSION OF CONSTRUCTION OPERATIONS, ALL DRAINAGE SYSTEMS AND STRUCTURES SHALL BE FREE FROM DIRT AND DEBRIS DEPOSITED DURING THE VARIOUS CONSTRUCTION OPERATIONS.

NOTES:

1. FOR WALL BILL OF MATERIAL, REFER TO SHEET NWF-6.
2. ALL MEASUREMENTS AND STATIONS ARE TAKEN ALONG THE FRONT FACE OF NAW UNLESS NOTED OTHERWISE.
3. TOP OF WALL AND TOP OF POST ELEVATIONS ARE TO MATCH, AS SHOWN IN THE ELEVATION VIEW.
4. FOR OVERLAP, SEE NAW 17.75N, NB AND ISTHA STANDARD G16-00 SHEET 3 OF 3.
5. THE DIMENSION SHOWN IS THE MAXIMUM GRADE DIFFERENCE BETWEEN FRONT FACE OF THE NAW AND BACK FACE OF THE NAW, AT ANY POINT, ALONG THE LENGTH OF THE WALL.

DRAWING NO. 1147 OF 1762

PLOT DATE = 7/16/2020 PLOT TIME = 5:48:29 PM PLOT SCALE = 32.0000 ' / in.

GENERAL

1. ALL DIMENSIONS ARE IN FEET UNLESS NOTED OTHERWISE.
2. ALL PLAN DIMENSIONS ARE HORIZONTAL EXCEPT AS NOTED OTHERWISE.
3. PLAN DIMENSIONS AND DETAILS RELATIVE TO EXISTING STRUCTURE HAVE BEEN TAKEN FROM EXISTING PLANS AND ARE SUBJECT TO NOMINAL CONSTRUCTION VARIATIONS. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY SUCH DIMENSIONS AND DETAILS IN THE FIELD AND MAKE NECESSARY APPROVED ADJUSTMENTS PRIOR TO CONSTRUCTION OR ORDERING OF MATERIALS. SUCH VARIATIONS SHALL NOT BE CAUSE FOR ADDITIONAL COMPENSATION FOR A CHANGE IN THE SCOPE OF WORK; HOWEVER, THE CONTRACTOR SHALL BE PAID FOR THE QUANTITY ACTUALLY FURNISHED AT THE UNIT PRICE FOR THE WORK.
4. FOR EXISTING UTILITIES AND CONFLICT, SEE "EXISTING UTILITY PLAN" SHEETS.

CONSTRUCTION

1. CONTRACTOR SHALL NOT SCALE DIMENSIONS FROM THE CONTRACT PLANS FOR CONSTRUCTION PURPOSES. SCALES SHOWN ARE FOR INFORMATION ONLY.
2. NO CONSTRUCTION JOINTS EXCEPT THOSE SHOWN ON THE PLANS WILL BE ALLOWED UNLESS APPROVED BY THE ENGINEER.
3. THE CONTRACTOR MAY REQUEST COPIES OF EXISTING CONSTRUCTION PLANS THAT ARE CURRENTLY ON FILE WITH THE TOLLWAY. THE REQUEST SHALL BE IN WRITING WITH THE UNDERSTANDING THAT ANY REPRODUCTION COST WILL BE AT THE CONTRACTOR'S EXPENSE AT NO ADDITIONAL COST TO THE ILLINOIS TOLLWAY.
4. NO CONCRETE CUTTING SHALL BE PERMITTED UNTIL THE CUTTING LIMITS HAVE BEEN OUTLINED BY THE CONTRACTOR AND APPROVED BY THE ENGINEER.
5. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL UTILITIES PRIOR TO STARTING CONSTRUCTION. CALL J.U.L.I.E., 800-892-0123.
6. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL FIBER OPTIC UTILITIES PRIOR TO STARTING CONSTRUCTION. THE CONTRACTOR SHALL INITIATE THE LOCATION PROCESS FOR THE FIBER OPTIC CABLE BY COMPLETING A "REQUEST TOLLWAY UTILITIES LOCATE" FORM FILLED IN ONLINE AT THE TOLLWAY WEBSITE UNDER "DOING BUSINESS" AT LEAST FOUR (4) BUSINESS DAYS PRIOR TO STARTING ANY UNDERGROUND OPERATIONS, EXCAVATIONS OR DIGGING OF ANY TYPE IN THE GENERAL AREA OF THE FIBER OPTIC CABLE.
7. THE SOIL BORING LOGS REPRESENT POINT INFORMATION. PRESENTATION OF THIS INFORMATION IN NO WAY IMPLIES THAT SUBSURFACE CONDITIONS ARE THE SAME AT LOCATIONS OTHER THAN THE EXACT LOCATION OF THE BORING.
8. WHENEVER ANY MATERIAL IS DEPOSITED INTO A DRAINAGE SYSTEM OR DRAINAGE STRUCTURES, THE DEPOSITED MATERIAL SHALL BE REMOVED AT THE CLOSE OF EACH WORKING DAY. AT THE CONCLUSION OF CONSTRUCTION OPERATIONS, ALL DRAINAGE SYSTEMS AND STRUCTURES SHALL BE FREE FROM DIRT AND DEBRIS DEPOSITED DURING THE VARIOUS CONSTRUCTION OPERATIONS.
9. THE CONTRACTOR SHALL USE CARE WHEN EXCAVATING AROUND EXISTING FOUNDATIONS. ANY DAMAGE TO THE EXISTING STRUCTURE AND/OR SUPPORTING FOUNDATION SHALL BE REPAIRED OR REPLACED AT THE CONTRACTOR'S EXPENSE.

NOTE:
1. WORK THIS SHEET WITH ILLINOIS TOLLWAY STANDARDS G-13 AND G-14.

* TO ACCOMMODATE VARYING SLAB GRADES, PANEL HEIGHTS WILL VARY TO FOLLOW SLOPE ON BUMP-OUT SLAB AND MAINTAIN A 1" GAP BETWEEN BOTTOM OF PANEL AND TOP OF SLAB.

GENERAL NOTES

1. CONTRACTOR SHALL NOT SCALE DIMENSIONS FROM THE CONTRACT PLANS FOR CONSTRUCTION PURPOSES. SCALES SHOWN ARE FOR INFORMATION ONLY.
2. NO CONSTRUCTION JOINTS EXCEPT THOSE SHOWN ON THE PLANS SHALL BE ALLOWED UNLESS APPROVED BY THE ENGINEER.
3. THE CONTRACTOR MAY REQUEST COPIES OF EXISTING CONSTRUCTION PLANS THAT ARE CURRENTLY ON FILE WITH THE ILLINOIS TOLLWAY. THE REQUEST SHALL BE IN WRITING WITH THE UNDERSTANDING THAT ANY REPRODUCTION COST WILL BE AT THE CONTRACTOR'S EXPENSE AT NO ADDITIONAL COST TO THE ILLINOIS TOLLWAY.
4. NO CONCRETE CUTTING SHALL BE PERMITTED UNTIL THE CUTTING LIMITS HAVE BEEN OUTLINED BY THE CONTRACTOR AND APPROVED BY THE ENGINEER.
5. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL UTILITIES PRIOR TO STARTING CONSTRUCTION. CONTACT J.U.L.I.E., 800-892-0123.
6. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL FIBER OPTIC UTILITIES PRIOR TO STARTING CONSTRUCTION. THE CONTRACTOR SHALL INITIATE THE LOCATION PROCESS FOR THE FIBER OPTIC CABLE BY COMPLETING A "REQUEST ILLINOIS TOLLWAY UTILITIES LOCATE" FORM ONLINE AT THE ILLINOIS TOLLWAY WEBSITE UNDER "DOING BUSINESS" AT LEAST FOUR (4) BUSINESS DAYS PRIOR TO STARTING ANY UNDERGROUND OPERATIONS, EXCAVATIONS OR DIGGING OF ANY TYPE IN THE GENERAL AREA OF THE FIBER OPTIC CABLE."
7. WHENEVER ANY MATERIAL IS DEPOSITED INTO A DRAINAGE SYSTEM OR DRAINAGE STRUCTURES, THE DEPOSITED MATERIAL SHALL BE REMOVED AT THE CLOSE OF EACH WORKING DAY. AT THE CONCLUSION OF CONSTRUCTION OPERATIONS, ALL DRAINAGE SYSTEMS AND STRUCTURES SHALL BE FREE FROM DIRT AND DEBRIS DEPOSITED DURING THE VARIOUS CONSTRUCTION OPERATIONS.

GENERAL NOTES

1. CONTRACTOR SHALL NOT SCALE DIMENSIONS FROM THE CONTRACT PLANS FOR CONSTRUCTION PURPOSES. SCALES SHOWN ARE FOR INFORMATION ONLY.
2. NO CONSTRUCTION JOINTS EXCEPT THOSE SHOWN ON THE PLANS SHALL BE ALLOWED UNLESS APPROVED BY THE ENGINEER.
3. THE CONTRACTOR MAY REQUEST COPIES OF EXISTING CONSTRUCTION PLANS THAT ARE CURRENTLY ON FILE WITH THE ILLINOIS TOLLWAY. THE REQUEST SHALL BE IN WRITING WITH THE UNDERSTANDING THAT ANY REPRODUCTION COST WILL BE AT THE CONTRACTOR'S EXPENSE AT NO ADDITIONAL COST TO THE ILLINOIS TOLLWAY.
4. NO CONCRETE CUTTING SHALL BE PERMITTED UNTIL THE CUTTING LIMITS HAVE BEEN OUTLINED BY THE CONTRACTOR AND APPROVED BY THE ENGINEER.
5. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL UTILITIES PRIOR TO STARTING CONSTRUCTION. CONTACT J.U.L.I.E., 800-892-0123.
6. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL FIBER OPTIC UTILITIES PRIOR TO STARTING CONSTRUCTION. THE CONTRACTOR SHALL INITIATE THE LOCATION PROCESS FOR THE FIBER OPTIC CABLE BY COMPLETING A "REQUEST ILLINOIS TOLLWAY UTILITIES LOCATE" FORM ONLINE AT THE ILLINOIS TOLLWAY WEBSITE UNDER "DOING BUSINESS" AT LEAST FOUR (4) BUSINESS DAYS PRIOR TO STARTING ANY UNDERGROUND OPERATIONS, EXCAVATIONS OR DIGGING OF ANY TYPE IN THE GENERAL AREA OF THE FIBER OPTIC CABLE."
7. WHENEVER ANY MATERIAL IS DEPOSITED INTO A DRAINAGE SYSTEM OR DRAINAGE STRUCTURES, THE DEPOSITED MATERIAL SHALL BE REMOVED AT THE CLOSE OF EACH WORKING DAY. AT THE CONCLUSION OF CONSTRUCTION OPERATIONS, ALL DRAINAGE SYSTEMS AND STRUCTURES SHALL BE FREE FROM DIRT AND DEBRIS DEPOSITED DURING THE VARIOUS CONSTRUCTION OPERATIONS.

GENERAL NOTES

1. CONTRACTOR SHALL NOT SCALE DIMENSIONS FROM THE CONTRACT PLANS FOR CONSTRUCTION PURPOSES. SCALES SHOWN ARE FOR INFORMATION ONLY.
2. NO CONSTRUCTION JOINTS EXCEPT THOSE SHOWN ON THE PLANS SHALL BE ALLOWED UNLESS APPROVED BY THE ENGINEER.
3. THE CONTRACTOR MAY REQUEST COPIES OF EXISTING CONSTRUCTION PLANS THAT ARE CURRENTLY ON FILE WITH THE ILLINOIS TOLLWAY. THE REQUEST SHALL BE IN WRITING WITH THE UNDERSTANDING THAT ANY REPRODUCTION COST WILL BE AT THE CONTRACTOR'S EXPENSE AT NO ADDITIONAL COST TO THE ILLINOIS TOLLWAY.
4. NO CONCRETE CUTTING SHALL BE PERMITTED UNTIL THE CUTTING LIMITS HAVE BEEN OUTLINED BY THE CONTRACTOR AND APPROVED BY THE ENGINEER.
5. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL UTILITIES PRIOR TO STARTING CONSTRUCTION. CONTACT J.U.L.I.E., 800-892-0123.
6. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL FIBER OPTIC UTILITIES PRIOR TO STARTING CONSTRUCTION. THE CONTRACTOR SHALL INITIATE THE LOCATION PROCESS FOR THE FIBER OPTIC CABLE BY COMPLETING A "REQUEST ILLINOIS TOLLWAY UTILITIES LOCATE" FORM ONLINE AT THE ILLINOIS TOLLWAY WEBSITE UNDER "DOING BUSINESS" AT LEAST FOUR (4) BUSINESS DAYS PRIOR TO STARTING ANY UNDERGROUND OPERATIONS, EXCAVATIONS OR DIGGING OF ANY TYPE IN THE GENERAL AREA OF THE FIBER OPTIC CABLE."
7. WHENEVER ANY MATERIAL IS DEPOSITED INTO A DRAINAGE SYSTEM OR DRAINAGE STRUCTURES, THE DEPOSITED MATERIAL SHALL BE REMOVED AT THE CLOSE OF EACH WORKING DAY. AT THE CONCLUSION OF CONSTRUCTION OPERATIONS, ALL DRAINAGE SYSTEMS AND STRUCTURES SHALL BE FREE FROM DIRT AND DEBRIS DEPOSITED DURING THE VARIOUS CONSTRUCTION OPERATIONS.

NOTE:

1. WORK THIS SHEET WITH ILLINOIS TOLLWAY STANDARDS G13 OR G14.

* TO ACCOMMODATE VARYING SLAB GRADES, PANEL HEIGHTS WILL VARY TO FOLLOW SLOPE ON BUMP-OUT SLAB AND MAINTAIN A 1" GAP BETWEEN BOTTOM OF PANEL AND TOP OF SLAB.

*** CONTRACTOR MAY INCREASE BOTTOM PANEL HEIGHTS AND USE UP TO AN 8FT (NON-STANDARD) MAXIMUM HEIGHT PANEL. THE ADJACENT TOP PANEL MAY ALSO BE ADJUSTED, PROVIDED STANDARD PANEL HEIGHTS AS SHOWN IN STANDARD G13 ARE USED. CONTRACTOR SHALL SUBMIT SHOP DRAWINGS TO THE ENGINEER FOR REVIEW PRIOR TO INSTALLATION.

GENERAL NOTES

1. CONTRACTOR SHALL NOT SCALE DIMENSIONS FROM THE CONTRACT PLANS FOR CONSTRUCTION PURPOSES. SCALES SHOWN ARE FOR INFORMATION ONLY.
2. NO CONSTRUCTION JOINTS EXCEPT THOSE SHOWN ON THE PLANS SHALL BE ALLOWED UNLESS APPROVED BY THE ENGINEER.
3. THE CONTRACTOR MAY REQUEST COPIES OF EXISTING CONSTRUCTION PLANS THAT ARE CURRENTLY ON FILE WITH THE ILLINOIS TOLLWAY. THE REQUEST SHALL BE IN WRITING WITH THE UNDERSTANDING THAT ANY REPRODUCTION COST WILL BE AT THE CONTRACTOR'S EXPENSE AT NO ADDITIONAL COST TO THE ILLINOIS TOLLWAY.
4. NO CONCRETE CUTTING SHALL BE PERMITTED UNTIL THE CUTTING LIMITS HAVE BEEN OUTLINED BY THE CONTRACTOR AND APPROVED BY THE ENGINEER.
5. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL UTILITIES PRIOR TO STARTING CONSTRUCTION. CONTACT J.U.L.I.E., 800-892-0123.
6. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL FIBER OPTIC UTILITIES PRIOR TO STARTING CONSTRUCTION. THE CONTRACTOR SHALL INITIATE THE LOCATION PROCESS FOR THE FIBER OPTIC CABLE BY COMPLETING A "REQUEST ILLINOIS TOLLWAY UTILITIES LOCATE" FORM ONLINE AT THE ILLINOIS TOLLWAY WEBSITE UNDER "DOING BUSINESS" AT LEAST FOUR (4) BUSINESS DAYS PRIOR TO STARTING ANY UNDERGROUND OPERATIONS, EXCAVATIONS OR DIGGING OF ANY TYPE IN THE GENERAL AREA OF THE FIBER OPTIC CABLE."
7. WHENEVER ANY MATERIAL IS DEPOSITED INTO A DRAINAGE SYSTEM OR DRAINAGE STRUCTURES, THE DEPOSITED MATERIAL SHALL BE REMOVED AT THE CLOSE OF EACH WORKING DAY. AT THE CONCLUSION OF CONSTRUCTION OPERATIONS, ALL DRAINAGE SYSTEMS AND STRUCTURES SHALL BE FREE FROM DIRT AND DEBRIS DEPOSITED DURING THE VARIOUS CONSTRUCTION OPERATIONS.

NOISE ABATEMENT WALL TS19.10N, NB
GENERAL PLAN & ELEVATION 2

SHEET NO. NWK - 2 OF 15

DRAWING NO. 1195 OF 1762

GENERAL

1. ALL DIMENSIONS ARE IN FEET UNLESS NOTED OTHERWISE.
2. ALL PLAN DIMENSIONS ARE HORIZONTAL EXCEPT AS NOTED OTHERWISE.
3. PLAN DIMENSIONS AND DETAILS RELATIVE TO EXISTING STRUCTURE HAVE BEEN TAKEN FROM EXISTING PLANS AND ARE SUBJECT TO NOMINAL CONSTRUCTION VARIATIONS. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY SUCH DIMENSIONS AND DETAILS IN THE FIELD AND MAKE NECESSARY APPROVED ADJUSTMENTS PRIOR TO CONSTRUCTION OR ORDERING OF MATERIALS. SUCH VARIATIONS SHALL NOT BE CAUSE FOR ADDITIONAL COMPENSATION FOR A CHANGE IN THE SCOPE OF WORK; HOWEVER, THE CONTRACTOR SHALL BE PAID FOR THE QUANTITY ACTUALLY FURNISHED AT THE UNIT PRICE FOR THE WORK.
4. FOR EXISTING UTILITIES AND CONFLICT, SEE "EXISTING UTILITY PLAN" SHEETS.

CONSTRUCTION

1. CONTRACTOR SHALL NOT SCALE DIMENSIONS FROM THE CONTRACT PLANS FOR CONSTRUCTION PURPOSES. SCALES SHOWN ARE FOR INFORMATION ONLY.
2. NO CONSTRUCTION JOINTS EXCEPT THOSE SHOWN ON THE PLANS WILL BE ALLOWED UNLESS APPROVED BY THE ENGINEER.
3. THE CONTRACTOR MAY REQUEST COPIES OF EXISTING CONSTRUCTION PLANS THAT ARE CURRENTLY ON FILE WITH THE TOLLWAY. THE REQUEST SHALL BE IN WRITING WITH THE UNDERSTANDING THAT ANY REPRODUCTION COST WILL BE AT THE CONTRACTOR'S EXPENSE AT NO ADDITIONAL COST TO THE ILLINOIS TOLLWAY.
4. NO CONCRETE CUTTING SHALL BE PERMITTED UNTIL THE CUTTING LIMITS HAVE BEEN OUTLINED BY THE CONTRACTOR AND APPROVED BY THE ENGINEER.
5. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL UTILITIES PRIOR TO STARTING CONSTRUCTION. CALL J.U.L.I.E., 800-892-0123.
6. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION OF ALL FIBER OPTIC UTILITIES PRIOR TO STARTING CONSTRUCTION. THE CONTRACTOR SHALL INITIATE THE LOCATION PROCESS FOR THE FIBER OPTIC CABLE BY COMPLETING A "REQUEST TOLLWAY UTILITIES LOCATE" FORM FILLED IN ONLINE AT THE TOLLWAY WEBSITE UNDER "DOING BUSINESS" AT LEAST FOUR (4) BUSINESS DAYS PRIOR TO STARTING ANY UNDERGROUND OPERATIONS, EXCAVATIONS OR DIGGING OF ANY TYPE IN THE GENERAL AREA OF THE FIBER OPTIC CABLE.
7. THE SOIL BORING LOGS REPRESENT POINT INFORMATION. PRESENTATION OF THIS INFORMATION IN NO WAY IMPLIES THAT SUBSURFACE CONDITIONS ARE THE SAME AT LOCATIONS OTHER THAN THE EXACT LOCATION OF THE BORING.
8. WHENEVER ANY MATERIAL IS DEPOSITED INTO A DRAINAGE SYSTEM OR DRAINAGE STRUCTURES, THE DEPOSITED MATERIAL SHALL BE REMOVED AT THE CLOSE OF EACH WORKING DAY. AT THE CONCLUSION OF CONSTRUCTION OPERATIONS, ALL DRAINAGE SYSTEMS AND STRUCTURES SHALL BE FREE FROM DIRT AND DEBRIS DEPOSITED DURING THE VARIOUS CONSTRUCTION OPERATIONS.
9. THE CONTRACTOR SHALL USE CARE WHEN EXCAVATING AROUND EXISTING FOUNDATIONS. ANY DAMAGE TO THE EXISTING STRUCTURE AND/OR SUPPORTING FOUNDATION SHALL BE REPAIRED OR REPLACED AT THE CONTRACTOR'S EXPENSE.

1. "SOILS NOT APPROVED" SHALL NOT BE REUSED ON THE ILLINOIS TOLLWAY ROW AND SHALL BE DISPOSED OF AS EARTH EXCAVATION OR NON-SPECIAL WASTE DISPOSAL, TYPE 1 DEPENDING ON THE SOILS CLASSIFICATION.

2. "SOILS APPROVED WITH RESTRICTION" CAN BE REUSED IN THE FOLLOWING MUNICIPALITIES WHICH HAVE IEPA APPROVED GROUNDWATER ORDINANCES: HICKORY HILLS.

3. SOILS APPROVED WITH RESTRICTION THAT CANNOT BE REUSED WITHIN THE PROJECT AND SOILS NOT APPROVED MUST BE REMOVED AS EITHER NON-SPECIAL WASTE DISPOSAL, TYPE 1, THROUGH AN EXCAVATION PAY ITEM, OR INCLUDED IN THE COST OF THE ASSOCIATED WORK ITEM.

4. INCIDENTAL EXCAVATION IS OUTLINED IN A SEPARATE TABLE WHICH IDENTIFIES ENVIRONMENTAL SOIL CLASSIFICATION AND IS NOT CONSIDERED IN THE CALCULATION FOR SUITABLE EXCAVATION. THIS IS FOR INFORMATION ONLY EXCEPT FOR QUANTITIES OF TYPE 1 SOIL FOR DISPOSAL. PERFORMANCE BASED RETAINING WALLS EXCAVATION IS INCLUDED AS INCIDENTAL TO THE RETAINING WALL AND ASSUMED AS MSE UNLESS OTHERWISE STATED BY THE DESIGNER. QUANTITIES MAY BE ADJUSTED BASED ON WALL DESIGN.

5. WHEN THERE IS EXCESS SOIL APPROVED FOR REUSE OR APPROVED FOR REUSE WITH RESTRICTION, THE CONTRACTOR SHALL FIRST REUSE ENVIRONMENTAL SOILS TYPE 1 TO MINIMIZE THE VOLUME OF MATERIAL DISPOSED AT A NON-SPECIAL WASTE DISPOSAL FACILITY.

6. SUITABLE EXCAVATION, L, REPRESENTS SUITABLE EXCAVATED MATERIAL VOLUMES ADJUSTED FOR SHRINKAGE AND ONLY INCLUDES EARTHWORK VOLUMES ASSOCIATED WITH EARTH EXCAVATION, A.

7. THE COST TO PLACE AND COMPACT SUITABLE MATERIAL GENERATED FROM STRUCTURE EXCAVATION IN ACCORDANCE WITH THE EMBANKMENT (ILLINOIS TOLLWAY) SPECIAL PROVISION SHALL BE INCLUDED IN THE COST OF STRUCTURE EXCAVATION.

8. SS IS THE SHRINKAGE FACTOR, WHICH IS DETERMINED TO BE 15%. SST IS THE TOPSOIL SHRINKAGE FACTOR, WHICH IS DETERMINED TO BE 0%.

REQUEST FOR INFORMATION RECEIVED FROM THE PLAN HOLDERS
FOR CONTRACT I-20-4517
ILLINOIS STATE TOLL HIGHWAY AUTHORITY

DATE: July 21, 2020

NOTICE TO PLAN HOLDERS

1. **QUESTION:**
Regarding Item JT546200 " Slotted Drains to Be Cleaned"

The specification says the slotted drains have to cleaned a minimum of one every month or at the discretion of the engineer. All the separate times that the slotted train is cleaned has to be included in the LF unit price. Is there any amount times that the slotted drain has be cleaned to put in our estimate or should estimate once a month to the amount cost that should be included in the unit price?

RESPONSE:
There is not a defined number of months that apply consistently to the entire contract quantity of Slotted Drains to be Cleaned. The Suggested Progress Schedule is located on Drawing Nos. 7 and 8. This schedule can be used to estimate the number of months that the various slotted drain locations will be in operation. The existing slotted drain that is currently located in the southbound outside shoulder will need to be in operation from Stage 1 through the completion of Winter Stage 1. The slotted drain that will be constructed in the median crossovers will need to be in operation from Stage 1 through the completion of Stage 4. The slotted drain that will be installed in the southbound side of median barrier wall in the areas between the crossover locations will be in operation through the completion of Stage 2.

2. **QUESTION:**
Article 105.04 requires shop drawings for precast concrete items as well as structural and misc. structural steel, which are the structural components for noise wall. It also requires "All shop drawings detailing the fabrication of structural components shall be prepared and sealed by a Structural Engineer currently licensed by the State of Illinois". Meanwhile, the special provision section 107.1 requires professional liability insurance for NAW Pay Items. Can ISTHA confirm that by sealing our shop drawings and providing professional liability insurance, we will not have any liability with the structural design? Is the intent for the supplier to only be liable for the shop drawings adhering to the contract documents without taking liability of the structural design?

RESPONSE:
Revised special provision for Precast Concrete Noise Abatement Wall included in addendum addresses the issues in this question. Note that shop drawings shall be prepared, submitted and sealed by a Structural Engineer. Also note that per Section 107.1 Professional Liability is required.

3. **QUESTION:**
Delivery, Storage, and Handling. The materials for the Precast Concrete Noise Abatement Walls shall be stored by the Contractor at a site(s) approved by the Engineer until the time of installation. The Contractor shall store material above ground on level platforms, covered and protected against wetting, and shall protect the materials from mechanical damage and damage due to excessive temperatures, sunlight, and moisture"

For the past 30 years, panels and columns have been stored outside covered and protected only with their respective coatings without issues. The special provisions require the columns to be galvanized and coated with a two-part epoxy paint and also require the already durable concrete panels be coated with the highest quality stain. Once covered and protected by staining, galvanizing and painting, these materials are built to last outside for a very long period of which their storage will be a very small fraction. Will these coatings (galvanizing, paint and stain) be considered as storing the materials "covered and protected against wetting… …and damage due to excessive temperatures, sunlight, and moisture"?

If we do account for the tremendous cost of a huge retractable roof, our panels will still not be protected from damage due to "excessive temperatures… …and moisture". Can ISTHA recommend any solution that will achieve this in IL, other than storing in a huge temperature and moisture-controlled enclosure, which would be an even greater cost?

RESPONSE:
Revised special provision for Precast Concrete Noise Abatement Wall included in addendum addresses the issues in this question. Note that storage of the panels and posts is at the Contractor's means and methods.

4. **QUESTION:**
The new standards call out a ¾" chamfer on all exposed edges of the panels. This will dramatically impact the wall aesthetics in a negative way. Millions of SF of noise abatement wall currently on the ISTHA system have been designed to minimize this joint so that the ashlar texture flows from panel to panel. By reducing the height allowed for panels and increasing the joints and then drawing attention to the joints with inevitable shadowing due to the chamfer, you are creating a very unusual look for an ashlar pattern. Just want to make sure this is the intention.

RESPONSE:
Revised special provision for Precast Concrete Noise Abatement Wall included in addendum allows the ¾" chamfer to be omitted at horizontal joints between panels if the ashlar pattern has been detailed to match the adjacent stacked panel.

5. **QUESTION:**
The specification states, "The Precast Concrete Noise Abatement Wall Panels shall be constructed with a square cut random ashlar rusticated limestone surface with a maximum relief along each side as shown on the details. The panel(s) height selected by the Fabricator should be compatible with Random Ashlar Limestone Form Liner Pattern." Just to clarify, if there is more than one panel between two columns, is the intent for the grout lines to line up from panel to panel to achieve a natural and continuous aesthetic or is the intent for each panel to have a formliner finish that is independent of the panel above or below?

RESPONSE:
Revised special provision for Precast Concrete Noise Abatement Wall included in addendum notes that the random ashlar limestone pattern shall be continuous for the full height of a panel section, regardless of the number of panels in a wall section. Note that the form liner pattern has been used before and manufacturers have lined up the pattern. The panel heights selected by the manufacturer should be compatible with the Random Ashlar Limestone form liner pattern and submitted for approval as part of the Shop Drawings.

6. **QUESTION:**
In the special provision under “Stain and Sealer” for the precast panels, it states “The base stain color of panels shall”, and it later states the stain “shall achieve color variations present in the natural stone being simulated for this project”. ISTHA walls have always been stained with a single, tan-type color to date. Is this saying that multiple colors of stain will have to be used?

RESPONSE:
The intent is to achieve color variations present in the natural stone. There is a standard base stain color stated in the Special Provisions and additional stains will be required to achieve the color variations.

7. **QUESTION:**
The standard drawings (Standard G13-00, CTS Str Mounted noise abatement wall details) show a 3” vertical reveal along each side of the panel in the “Typical Noise Wall Panel Detail” shown on the top left of the page. This detail shows Panel Width = 11’-6” max. Will the smooth reveal on each side of the panel be required for all panel widths (including short spans) or just the max width?

RESPONSE:
The smooth reveal on each side of the panel is required for all panel widths.

8. **QUESTION:**
The standard drawings (Standard G14-00, CTS Bumpout Mounted noise abatement wall details) show a 2 1/4” vertical reveal along each side of the panel in the “Typical Noise Wall Panel Detail” shown on the top right of the page. This detail shows Panel Width = 11’-6” max. Will the smooth reveal on each side of the panel be required for all panel widths (including short spans) or just the max width?

RESPONSE:
The smooth reveal on each side of the panel is required for all panel widths.

9. **QUESTION:**
The standard drawings (Standard G15-00, Non-Crashworthy Ground Mounted noise abatement wall details) show 2” vertical reveals on the ends of one face of the panel and 1’-0” vertical reveals on the opposite side in the “Ground Mounted Panel” detail shown mid-page. This same standard shows a 2” vertical reveal on all edges of both faces the panel in the “Ground Mounted Panel (Unbalanced Soil Load) detail shown on the top right of the page. This detail shows Panel Width = 19’-10” max. Will the smooth reveal on each side of the panel be required for all panel widths (including short spans) or just the max width?

RESPONSE:
The smooth reveal on each side of the panel is required for all panel widths.

10. **QUESTION:**
The standard drawings (Standard G16-00, Crashworthy Ground Mounted noise abatement wall details) show 3 5/8” vertical reveals on the ends of one face of the panel and 1’-0” vertical reveals on the opposite side in the “Ground Mounted Panel (No TL-4 Impact Load)” detail shown on the bottom right of the page. This same standard shows a 3 5/8” vertical reveal on all edges of both faces the panel in the “Ground Mounted Panel (TL-4 Impact Load) detail shown on the mid-left of the page. This detail shows Panel Width = 14’-10” max. Will the smooth reveal on each side of the panel be required for all panel widths (including short spans) or just the max width?

RESPONSE:
The smooth reveal on each side of the panel is required for all panel widths.

11. QUESTION:
ITS Removal plans show designations R0 through R6 to be pay item JT160226. This pay item is not in the SOQ. Is this supposed to be pay item JT160225?

RESPONSE:
The pay item used for the callouts should be JT160225 (SINGLE MODE FIBER OPTIC CABLE REMOVAL, SALVAGE). Plans have been updated with Addendum No. 1 to reflect this revision.

12. QUESTION:
For the electrical PVC casing pipes underneath 294, is it the intent for these pipes to be laid in with the pavement excavation? What is the required depth of these casing pipes? Typically these are 10 feet below pavement. If that is the case, can we install CNC conduit via directional bore method in lieu of deep trenched PVC conduit for these crossings?

RESPONSE:
A material substitution may be requested during construction and must be coordinated with ComEd.

13. QUESTION:
Pay item JT130751 (Install Prefabricated IPDC Facility): please confirm whether the prefabricated concrete step, bird deterrent, and/or air terminals will be provided with the ISTHA supplied building.

RESPONSE:
The concrete step needs to be provided. The bird deterrent and air terminals are provided by the Tollway.

14. QUESTION:
Pay item JT130751 (Install Prefabricated IPDC Facility): please provide information as to what will be included with this ISTHA supplied building.

RESPONSE:
As shown in the plans.

15. QUESTION:
Pay item JT130751 (Install Prefabricated IPDC Facility): Will the building come furnished complete with interior lighting and receptacles complete?

RESPONSE:
Yes.

16. QUESTION:
Pay item JT130751 (Install Prefabricated IPDC Facility): Will the building come furnished complete with all required HVAC components?

RESPONSE:
Yes.

17. QUESTION:
Pay item JT130751 (Install Prefabricated IPDC Facility): Will the ISTHA furnished building come with the natural gas standby generator?

RESPONSE:
No. The generator will be provided by others.

18. **QUESTION:**
For pay items JT830080, JT830090, and JT830094 (ISTHA Furnished Light Poles), will the Tollway be providing the anchor bolts for these poles?

RESPONSE:
No. Anchor bolts shall be furnished and installed by the Contractor.

19. **QUESTION:**
For pay items JT810502, JT810504, JT810506, JT810508, JT810510, please confirm that all of this duct is to be furnished by the Tollway.

RESPONSE:
Yes. Materials for pay items JT810502, JT810504, JT810506, JT810508, JT810510 are furnished by Tollway.

20. **QUESTION:**
Pay item JT830200 (Install Temporary Wood Pole 90 ft) are these poles and mast arms to be furnished by the Tollway?

RESPONSE:
Yes.

21. **QUESTION:**
Please confirm the temporary wood poles installed on this contract are all to be removed as a part of this contract.

RESPONSE:
Poles installed or relocated for interim ITS devices are to remain in place at the end of the contract.

22. **QUESTION 22:**
Per page 459 & 462: where is the removal of the temporary wood poles to be paid for? There is a quantity of 5 wood poles to be removed that have no pay item.

RESPONSE:
Temporary removal shall be as per 846.11 Tollway supplemental specification.

23. **QUESTION 23:**
How are the removals of existing junction boxes of pages 457-459 (QTY: 5) to be paid?

RESPONSE:
Removal of JB is included in associated wall removal.

24. **QUESTION 24:**
Per page 459, note 3, “Remove, store, and reinstall 10 existing…”, does ISTHA want us to store them ourselves? Or are we to return the sign luminaires to ISTHA for storage until we are ready to reinstall?

RESPONSE:
Contractor to store.

25. QUESTION 25:

Pages 477-480, notes 4 & 5 states, “No breakaway device needed for the ground mounted light pole located behind noise wall”. Of the 35 ground mounted poles, 19 have this note. Does this mean the other 16 of them should have breakaway devices? If so, where is this to be paid? There is only 5 breakaway devices in the bid quantity.

RESPONSE:

As per tollway supplemental specification 838.04 (apply to Tollway ground mounted poles) :
“Breakaway devices shall not be measured for payment when specified as part of Ground Mounted Light Poles as specified in these Supplemental Specifications Section 830 but shall be included in the cost of the Light Pole.”

26. QUESTION 26:

Per page 493, there is no pay item for the cable/conduit description, “K”- aerial cable, 3-1/C NO. 2 w/ messenger wire. How is this to be paid?

RESPONSE:

This will be paid under Electrical Service installation (TEMPORARY ELECTRIC SERVICE INSTALLATION).

27. QUESTION 27:

Per page 493, there is no pay item for the proposed temporary wood poles, Class 3, 30’. There is also no pay item for the proposed temporary lighting controller, pole mounted. How are these to be paid?

RESPONSE:

This will be paid under Electrical Service installation (TEMPORARY ELECTRIC SERVICE INSTALLATION).

28. QUESTION 28:

For the conduit/cable description on page 502, the pay items listed for “A”, “B”, “C”, “E” & “I” do not match any of the pay items in the bid quantities. Please correct.

RESPONSE:

Revised Drawing 502 has been provided as part of Addendum No. 1.

29. QUESTION 29:

Please confirm that all wall mounted light poles that are not included as either a Type 1 Median Foundation OR listed in the ‘Special Light Pole Foundations’ table will not require a drilled shaft foundation.

RESPONSE:

Light poles foundation as per Plans.

30. QUESTION 30:

Page 509 has a junction box (b/w duct package labeled “A” and duct package labeled “C”) has no station marker and is not labeled with the size or installation method. Please provide information.

RESPONSE:

Please review sheet ITS 39 and 41 for details.

31. **QUESTION 31:**
Page 510 has a junction box (b/w duct package labeled “A” and duct package labeled “C”) has no station marker and is not labeled with the size or installation method. Please provide information.

RESPONSE:
Please review sheet ITS 39 and 41 for details.

32. **QUESTION 32:**
Page 513, note 1 states, “The trench, detectable warning tape and sand backfill shall be paid for under JS819002. This pay item is not listed in the SOQ. Please provide the correct pay item that this will be paid under.

RESPONSE:
Warning tape will be paid as per 810.04 as specified in special provision for “INSTALL FURNISHED UNDERGROUND CONDUIT, COILABLE NON-METALLIC” and backfill will be paid as per special provision for "DUCT PACKAGE."

33. **QUESTION 33:**
Page 483, note 4, please provide the size of the conduit being intercepted.

RESPONSE:
Same as proposed.

34. **QUESTION 34:**
Page 484, note 3, please provide the size of the conduit being intercepted.

RESPONSE:
Same as proposed.

35. **QUESTION 35:**
Page 511, note 2, please provide the size of the conduit being intercepted.

RESPONSE:
Same as proposed.

END OF NOTICE TO PLAN HOLDERS
