## **ILLINOIS TOLLWAY ADDS INCLEMENT WEATHER DRIVING CONDITIONS TO REAL-TIME TWITTER FEEDS**

*Tollway tweets now offer pavement conditions along with accident, lane closure and incident reports*

**DOWNERS GROVE, IL** – The Illinois Tollway now is using Twitter to provide customers with real-time updates describing pavement conditions on all five of its roadways during winter storms and other weather events to enhance safety for drivers using its 294-mile system.

For the first time, drivers can check pavement conditions during snowstorms, flooding or other weather events by viewing the tweets for each Tollway, which will include the latest updates, along with information about roadway incidents and delays.

The tweets describe conditions for each roadway based on milepost markers and use information provided by Tollway crews operating from 12 maintenance sites across the Tollway system. This allows the Tollway to customize its tweets for specific portions of its roadways to provide the most accurate information to drivers.

The roadway reports will be updated frequently during storms and severe weather as pavement conditions change.

“The Tollway is continually looking to deliver new ways to serve our customers and keep them safe,” said Illinois Tollway Executive Director Liz Gorman. “Using Twitter allows us to send information directly to our customers describing the current conditions on the specific road and alerting them to any changes caused by severe weather.”

The Tollway previously offered real-time roadway incident information on Twitter, including the type of incident, location and impact on traffic. Providing updates of pavement conditions in tweets will assist customers in planning their trips during severe weather.

Drivers can receive year-round, real-time information on pavement conditions and roadway incidents by signing up for Tollway Trip Tweets at [twitter.com](https://twitter.com) from the Tollway’s website at [illinoistollway.com](http://illinoistollway.com). Tweeters can follow all five Tollway Trips or just the roadways that interest them.

The five are: @94\_294\_Tollway, @I\_90\_Tollway, @I\_88\_Tollway, @I\_355\_Tollway and @IL\_390\_Tollway.

The roadway and incident information offered in the tweets is provided by Tollway maintenance crews and the agency’s Traffic Operations Center, which is staffed 24 hours a day, seven days a week.

### **About the Illinois Tollway**

The Illinois Tollway is a user-fee system that receives no state or federal funds for maintenance and operations. The agency maintains and operates 294 miles of roadways in 12 counties in Northern Illinois, including the Reagan Memorial Tollway (I-88), the Veterans Memorial Tollway (I-355), the Jane Addams Memorial Tollway (I-90), the Tri-State Tollway (I-94/I-294/I-80) and the Illinois Route 390 Tollway.
