

To enjoy the I-PASS discount on tolls, you must use a transponder.

If a transponder is not detected, we will use a photo of your license plate to attempt to post a “video toll” to your account so that you can avoid violations. After five video tolls on a single license plate in one month, you will lose the I-PASS discount on tolls for that license plate, and any subsequent video tolls to that plate will post at the full cash rate for the remainder of the month.

Properly Install Your Transponder

To ensure the transponder is read accurately it should be properly mounted on the vehicle’s windshield using the removable mounting strips. The strips do not leave a residue on your windshield. Mounting strips are available at no cost at all Customer Service Centers and every manned toll plaza.

USE YOUR
I-PASS
TRANSPONDER
FOR TOLL
DISCOUNTS

Additional mounting strips are available at Customer Service Centers and toll plazas.

Some windshields require different transponder installation. Review transponder installation exceptions.

The Indiana Toll Road Concession Company is also charging I-PASS customers \$1.00 surcharge for improperly mounted transponders. The surcharge will be added to the standard toll charge on your account statement.
