

SECURING TO YOUR MOTORCYCLE

- 1 Windshield:** If the motorcycle has a windshield, the transponder can be mounted on the windshield (It must be placed above any metal windshield bracket).
- 2 Handlebars:** The transponder may also be secured to the handlebars with a strap (not included).

NOTE: The transponder must not have any metal between it and the radio antenna that reads your device as you go through tolls.

- 3 Aftermarket brackets:** Transponder brackets also be purchased online. Search “toll transponder holders for motorcycles.” Choose the one that best suits your bike.

Once the transponder is secured to your motorcycle, it is a good idea to go through a cash lane or an I-PASS Only lane and watch for the blue light, which indicates your transponder is functioning properly.
